## The Complete Book on Medical Plastics

<b>Code</b>	NI172
<b>Format</b>	paperback
<b>Indian Price</b>	₹975
<b>US Price</b>	\$100
<b>Pages</b>	368
<b>ISBN</b>	8178330008
<b>Publisher</b>	Asia Pacific Business Press Inc.

### Description

Plastics currently form one of the most important components of the medical industry. Medical device designers and engineers increasingly prefer plastics to conventional

packaging materials such as metals owing to superior flexibility offered by plastics in fabrication process. Advancements in sterilization techniques shift towards disposable devices, development of enhanced plastic materials, and technological innovations are factors driving the overall market growth and expansion. The development of novel materials such as biocompatible polymers for use in medical implants will furthermore provide the required impetus for the global medical plastics market. Every day, plastics are involved in critical surgeries, life saving efforts, and routine medical procedures. Plastic materials can be sterilized hundreds of times without degradation. Lightweight plastics are used to form replacement joints, non surgical supports, and therapy equipment. Clear plastics provide visibility for transfusions, surgeries, and diagnostic equipment of all kinds and plastics can be machined, molded, or formed into almost any shape imaginable. The use of plastics in health care field encompasses several distinct markets. Plastic is used on a large scale as medical devices like disposable syringes, optical and dental products, heart valves, contact lenses and many more medical products. This way plastic has very importance in making medical devices. The medical plastics industry is set to expand rapidly over the next decade taking up increasing proportions of GDP, as countries provide healthcare to an ageing population, access to medicine expands in developing regions and new technology is developed.

This book basically deals with significance of packaging for pharmaceuticals & medical industry, tablets & capsules liquids, creams and ointments, OPVC, OPP and oriented and non oriented pet containers, blister trays for ampoules, cartridge tubes etc., shrink packaging and stretch wrapping, conducting health based risk assessments of medical materials, performance properties of metallocene polyethylene, EVA, and flexible PVC films, polyurethane thin film welding for medical device applications, polyurethane film as an alternative to PVC and latex, opportunities for PVC replacement in medical solution containers, thermoplastic silicone urethane copolymers : a new class of biomedical elastomers, selecting materials for medical products : from PVC to metallocene polyolefins, injection molding engineering plastics, assessing the performance and suitability of parylene coating etc.

The present book contains the important information of plastics in medical field and their uses in various ways. This is very useful book for entrepreneurs, researchers, technocrats and technical institutions.

## **Content**

### **1. SIGNIFICANCE OF PACKAGING FOR PHARMA & MEDICAL INDUSTRY**

Tablets & Capsules

Liquids

Creams and Ointments  
Labels  
Caps & Closures  
Wadding Materials  
Specific New Systems  
Opvc, Opp and Oriented and Non-oriented Pet Containers  
Blister Trays For Ampoules, Cartridge Tubes Etc.  
Single-serve/Unit Dose Packages (Laminates of PPR, Plastics and Foil)  
The Delcap Metered-dose  
Form, Fill, Sealing of Plastic Bottles Under Aseptic Condition  
Radiation Resistant PP Bottles  
Double Derker Spray-aerosol  
Single Dose Blister-break Open Packs  
Capped Gabletop Cartons  
Refillable, Reusable and Recycliable Aerosols  
Shrink Packaging and Stretch Wrapping  
Bulk Drug and Fine Chemicals  
Packaging of Medical Devices  
Materials & Technologies  
Tyvek  
Dot Coat Advantages  
Tyvak vs. Paper  
Peelable Paper Lidding Materials  
Advantages  
Applications  
Medical Grade Pressure Sensitive Materials  
Advantages  
Applications  
Evoh in Health Care Packaging (HCP)  
Packaging Requirements For Health Care Products  
Structure, Props & Uses  
Barrier Bottles/Vials  
Evoth  
Other Important Area of Use  
Packaging & Sterility  
Plastics and Their Biomedical Applications  
Pharmaceutical & Medical Packaging  
New Development  
Packaging Waste Directive  
The Directive  
Conclusion

## 2. TESTING

Conducting Health-Based Risk Assessments of Medical Materials

Nancy Stark

Standards and Guidances

Method

Hazard Identification

Dose-Response Assessment

Exposure Assessment

Risk Characterization

Nitinol Implant

Wound-Dressing Formulation

Perchloroethylene Solvent

Ligature Material

Sources of Data

Uncertainty Factors

Safety Margins

Conclusion

Pharmaceutical

Pharmaceutical Market Focuses on Cutting Costs, Not Value

Some Segments Promising

Regulatory Requirements

Packaging Machinery

Other Trends

The Future

## 3. STERILIZATION

Traditional Processes

New Processes

Chemical Processes (Gas/Liquid)

Peracetic Acid

Hydrogen Peroxide

Ozone

Chlorine Dioxide

Physicochemical Processes

Plasmas

Steam

Synergetic Processes

Psoralens and UVA (PUVA)

Microwave and Bactericide

Low-Temperature Steam and Formaldehyde

Physical Processes

Microwaves

Pulsed-Light Systems

Validation of Sterilizer Processes

#### 4. HIGH PERFORMANCE PVC COMPOUNDS & TPE™ S FOR MEDICAL APPLICATION

Long Term Contribution of PVC in Health Care

Pvc™ s Dominance in the Growing Market

Challenges by Environmentalist to PVC

Key Barriers to PVC Replacement

The Major Factors Which Continue to Favour the Use of PVC are

PVC Innovation

ABC of Innovation

Features of Hi-performance PVC Compounds

The Use of Hi-performance PVC in Medical Devices

TPE Based on Pvc Replaces Silicone

TPE Based on PVC Outflexes Silicone Rubber

#### 5. INNOVATIONS REMAKE PLASTIC INJECTION MOLDING

Useful Properties

Parts on a Diet

Equipment and Processes

Automating for Success

Conclusion

#### 6. POLYVINYL CHLORIDE IN CRITICAL HEALTHCARE PRODUCTS

Factors Which Made Polyvinyl Chloride the Material of Choice for the Fabrication of Medical Devices

Typical Medical Applications of PVC

Choice of Plasticisers

Containers for the Collection and Storage of Blood and Blood Products

Storage of Platelets

Containers for Intravenous Fluids and for Parenteral Nutrition

Containers for Constant Ambulatory Peritoneal Dialysis Solutions (Capd Bags)

Containers for the Collection and Storage of Cord Blood

Reported Deleterious Effects of Dehp Plasticised PVC and the Present Position

Trends in the Development of Newer Materials

#### 7. ADVANCES IN MEDICAL PLASTICS

Microtagging

Thermosets

Antithrombogenic Coatings

Dryfilm Lubricant  
Curing Process for Synthetic Polyisoprene Latex  
Topas Cyclic Olefin Copolymer

## 8. MEDICAL APPLICATIONS OF POLYCARBONATE

Processing  
Sterilization  
Typical Applications  
Renal Dialysis  
Cardiac Surgery Products  
Surgical Instruments  
IV Connection Components  
Polycarbonate Developments for the Medical Market  
Radiation Grades  
High-Temperature Grades  
Polycarbonate Blends  
Enhanced-Productivity Grades for Cleanroom Molding  
Lipid-Resistant Grades  
Conclusion

## 9. RADIO-FREQUENCY SEALING FOR DISPOSABLE MEDICAL PRODUCTS

Steve Myers  
What is RF Sealing?  
How RF Works  
Sizing RF Sealers  
Tooling  
Efficient RF Sealing Techniques  
Maximum Throughput With Automation  
Double-cycle Sealing  
Comparing RF With Other Sealing Technologies  
Conclusion

## 10. PET BOTTLES AND APET SHEET FOR BLISTER PACKING FOR PHARMA APPLICATION

Pet Conversion Processes  
Pet – A Pure Polymer  
Pet Bottles for Pharma  
Filling Lines for Pet Bottles  
Case Study for Use of Pet Bottles in Pharma Industry  
Conclusion  
Generic Drugs That Can Be Packed in Pet Bottles  
Ayurvedic Products That Can Be Packed In Pet

Cost-Competitiveness of Pet Bottle for Pharma Industry  
Pet Bottles for Pharma Products – Useful Tips  
Apet Sheet – Material, Processing & Applications  
Apet Sheets – Total Consumption  
Apet Thin Sheet  
What is Apet Sheet  
Factors For Growing Interest in Apet Sheet  
Advantages of Apet Sheet  
Blister Packing  
Apet Sheet vs. PVC Sheet  
Apet Sheet vs. PP Sheet  
Gas/Moisture Barrier Properties Pet vs. Other Polymers  
Salient Points of Apet Thin Sheet  
Pet – Ecofriendly and Recyclable  
Pet Converters – Expectations of Pharmaceutical Industry  
Development Trials for Pharma Industry By RIL  
Other Applications of Apet Thin Sheet  
Conclusion

## 11. BREATHABLE TPE FILMS FOR MEDICAL APPLICATIONS

Barrier Films  
Microclimate Dynamics  
TPE Resin Chemistry  
Soft Segments  
Hard Segments  
Film Manufacture  
Lamination  
Hot-Melt Screen Printing  
Melt Printing  
Porous Coating  
Spray Coating  
Medical Applications  
Conclusion

## 12. THE CHANGING ROLE OF THE MEDICAL DEVICE CONTRACT MANUFACTURER

Growth, Growth & Growth  
Outsourcing and Consolidation  
Meeting the Challenge

## 13. MEDICAL PACKAGING

Rising Demand Predicted

Drug/Device Products Lead The Way

Cost Considerations

Test Methods

Regulatory Picture

Conclusion

#### 14. PERFORMANCE PROPERTIES OF METALLOCENE POLYETHYLENE, EVA, AND FLEXIBLE PVC FILMS

Experimental Procedure

Results

Conclusion

#### 15. POLYURETHANE THIN-FILM WELDING FOR MEDICAL DEVICE APPLICATIONS

Weldability of Thermoplastics

Film-joining Methods

RF Welding

Ultrasonic Welding

Direct Thermal Sealing

Induction Welding

Solvent Bonding

Conclusion

#### 16. POLYURETHANE FILM AS AN ALTERNATIVE TO PVC AND LATEX PVC

Natural Rubber Latex (NRL)

Thermoplastic Polyurethanes

Concerns About PVC

#### 17. GAS PERMEABILITY AND MEDICAL FILM PRODUCTS

Materials and Experimental Methodology

Results and Discussion

Conclusion

#### 18. OPPORTUNITIES FOR PVC REPLACEMENT IN MEDICAL SOLUTION CONTAINERS

Ethylene-vinyl Acetate

Polyester

Polyolefin Blends

Polyolefin Laminates

Functionalized Polyolefins

Conclusion

## 19. PRODUCING BUBBLE/TAPER TUBING FOR MEDICAL APPLICATIONS

Extrusion-line Design

Forming Considerations

Cooling and Sizing

Pulling and Cutting Systems

Conclusion

## 20. THERMOPLASTIC SILICONE-URETHANE COPOLYMERS : A NEW CLASS OF BIOMEDICAL ELASTOMERS

Silicones

Thermoplastic Polyurethanes

Silicone-modified Polyurethanes

Silicone-urethane Copolymers

Conclusion

## 21. SELECTING MATERIALS FOR MEDICAL PRODUCTS : FROM PVC TO METALLOCENE POLYOLEFINS

Fundamental Considerations

Selecting Materials

Material Performance Versus Product Performance

PVC Versus Metallocenes

Advantages of PVC

Disadvantages of PVC

Advantages of Metallocenes

Potential Metallocene Disadvantages

Challenges for Metallocene Materials

Safety and Quality

Product Design and Processing

Product Performance

Conclusion

## 22. COATING AND SURFACE TREATMENT TECHNOLOGIES

Ion-Beam Processingâ€™Spire Corp. (Bedford, MA).

Light-Activated Surface Modificationâ€™BSI Corp. (Eden Prairie, MN).

Plasma Surface Engineeringâ€™Talisson Research (Sunnyvale, CA).

Antimicrobial/Antibiotic Coatingsâ€™STS Biopolymers, Inc. (Henrietta, NY).

Thromboresistant (Heparin) Coatingsâ€™Baxter Healthcare Corp. (Irvine, CA).

## 23. INJECTION MOLDING ENGINEERING PLASTICS

How It Works

Balancing Variables

Tool Design  
Design Aids  
Conclusion

## 24. GROWTH AND NEW CHALLENGES FOR DEVICE MARKET

Cost Concerns  
Steady Growth  
Regulatory Issues  
Technology Issues  
The Future

## 25. ASSESSING THE PERFORMANCE AND SUITABILITY OF PARYLENE COATING

Medical Coating Characteristics  
Medical Coating Applications  
Parylene Review  
Parylene N  
Parylene C  
Parylene D  
The Parylene Process  
Conclusion

## 26. PAPER OR PLASTIC? MEDICAL NONWOVEN COMBINES BEST PROPERTIES OF BOTH TAPES

Thin-Film Coater Improves Process Control  
Susan Wallace  
Chips Propel Advances in Medical Imaging Equipment  
Susan Wallace

## 27. PRODUCTS & SERVICES

Dispensing units  
Slot-die system  
Packaging system  
Tube cutter  
Automation equipment  
Injection moulding machines  
Catheter processing equipment  
Benchtop moulder

## 28. REPROCESSING DISPOSABLE (SINGLE-USE) ITEMS

Background  
How Safe Is Reprocessing

Benefits of Reprocessing

Definitions

Recycling

Reprocessing

Reprocessing Disposable (Single-use) Items

Reprocessing Disposable Surgical Gloves

Recycling or Reprocessing Disposable (Plastic) Syringes Andhypodermic Needles

Recycling Disposable Syringes

Reprocessing Disposable Syringes (and Needles)

Reprocessing Versus Disposal of Needles and Syringes

## 29. PLASTICS MEDICAL DISPOSABLES & AMPULE TRAYS WITH G.N. PRESSURE-FORMING TECHNOLOGY

Introduction

Ampule Package

Current Technology

Contact Heat, Cut-in-place, Pressure Thermoforming Technology

Quality Control

Flexibility

Efficiency

Simplicity

Applications of Contact Heat, Cut-in-place, Pressure Thermoformers

Design of Parts

Material

Production Volume

Cost

## 30. PVC IN MEDICAL APPLICATION

Introduction

Topic of Discussion

Medical Application For PVC

Benefits of PVC

Safety

Chemical Stability

Biocompatibility

Clarity & Transparency

Flexibility, Durability & Dependability

Sterilizability

Compatibility

Resistance to Chemical Stress Cracking

Low Cost

Additives Used for PVC Compounding  
Plasticisers  
Stabilisers  
PVC In Medical Products – An Environmental Perspective  
Regulation and Product Standards  
Good Manufacturing Practice (GMP)  
Important Aspects Of GMP  
Plastic Processing in Clean Rooms  
I.V. Fluid Containers: Why PVC?  
Cost Effectiveness  
Reliability  
Simplicity in the Filling Process  
Safety in the Hospital  
Conclusion

## About Niir

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
