The Complete Book on Biotechnology Based Bulk Drugs

Code	NI194
Format	paperback
Indian Price	₹1050
US Price	\$125
Pages	488
ISBN	9788190439879
Publisher	NIIR PROJECT CONSULTANCY SERVICES

Description

Biotechnology has played an essential role in the development of the healthcare chemical industries. The range of product includes diagnostic, prophylactic and therapeutic agents. The discovery of a potentially active compound starts a sequence of exhaustive chemical and biological testing that may culminate in manufacture of the agent or an improved analog. The role of biotechnology in this complex path to regulatory approval and marketing is diverse. Biotechnology is a field of applied biology that involves the use of living organisms and bioprocesses in engineering, technology, medicine and other fields requiring bio products. Biotechnology also utilizes these products for manufacturing purpose. Some of the examples of drugs produced through biotechnology are penicillin, lincomycin, streptomycin, tylosin, peptide antibiotics, cephalosporins, etc. Modern use of similar terms includes genetic engineering as well as cell and tissue culture technologies. Biotechnology draws on the pure biological sciences and in many instances is also dependent on knowledge and methods from outside the sphere of biology. Conversely, modern biological sciences are intimately entwined and dependent on the methods developed through biotechnology and what is commonly thought of as the life sciences industry. The development of biotechnology is taking place in almost all fields of human life. The recent advances in the field of basic genetics have opened up new vistas, potentials and possibilities.

Some of the fundamentals of the book are the pharmaceutical industries, marketing strategy, common features in the evolution of products and processes, process technology fermentation, product recovery, new trends in biotechnology, penicillins, biosynthesis and regulation of thienamycin, olivanic acids and epithienamycins, aminoglycoside antibiotics, streptidine and deoxystreptamine, streptomycin, neomycin, paromomycin, ribostamycin and, butirosin gentamicin, micronomicin and sisomicin, tylosin, peptide antibiotics, current applications of peptides, blasticidin S: an agricultural antibiotic bleomycin and bestatin: peptides used in anticancer therapy etc.

The present book contains process of biotechnology based bulk drugs like penicillin, B lactam antibiotics, aminoglycoside antibiotics, peptide antibiotics, anti cancer agents, lincomycin etc. This is very resourceful book for entrepreneurs, technocrats, research scholars, libraries etc.

Content

CHAPTER 1

INTRODUCTION

The Pharmaceutical Industries

Marketing Strategy

Common Features in the Evolution of Products and Processes

Process Technology

Fermentation

Product Recovery

New Trends in Biotechnology

CHAPTER 2

PENICILLINS

Historical Perspective History

Biosynthetic Penicillins

Process Overview

Fermentation Technology

The Culture: Strain Development

Mutation

Selection

Genetics

Fermentation Process : Flow Sheet

Facilities

Inoculum Development

Fermentation Stage: Medium

Process Control

Physiological Variables and Their Effect on Product Formation

Duration of the Fermentation

Recovery of Penicillin

Carbon Process (Obsolete)

Solvent Extraction Process (Industry Standard)

Process Overview

Filtration

Solvent Extraction

Carbon Treatment

Further Extraction

Crystallization

Drying

Further Processing

Penicillin Acid Process (State of the Art)

Semisynthetic Penicillins

6-Aminopenicillanic Acid

Enzymic Cleavage of Penicillins to Yield 6-Aminopenicillanic Acid

Chemical Preparation of 6-Aminopenicillanic Acid

Synthesis of Clinically Useful Penicillins and Closely Related Congeners

Automation

Process Economics

Costs

CHAPTER 3

NOVEL β -LACTAM ANTIBIOTICS

Thienamycin

Discovery

Chemistry

Pharmacological Activity

Chemical Synthesis

Biosynthesis and Regulation of Thienamycin

Biosynthesis

Regulation

Classical Fermentation Process

Introduction

Seed Stages

Production Stage

Fermentation Process Development

Strain Improvement

Fed-Batch Techniques

Synthetic Media

Novel Fermentation Processes

Ultrafiltration Coupled Fermenter

Immobilized Cells

Thienamycin Purification

Future Prospects

Market Projections

Clavulanic Acid

Introduction

Production

Market

Olivanic Acids and Epithienamycins

Nocardicins

Introduction

Production of Nocardicin A

Market Projections

Monobactams

CHAPTER 4

AMINOGLYCOSIDE ANTIBIOTICS

Streptidine and Deoxystreptamine

Streptomycin

Neomycin, Paromomycin, Ribostamycin and Butirosin

Gentamicin, Micronomicin and Sisomicin

Fortamine and Fortimicins

Mutasynthesis

A-Factor

Metabolic Grid

Manufacture

Fermentation

Microorganisms

Equipment

Inoculum Development

Media

Procedures

Isolation

Strain Improvement

CHAPTER 5

TYLOSIN

Production Technology

Structure of Tylosin and Related Compounds

Biosynthetic Pathway

Growth of Producer Microorganisms

Product Recovery and Purification

Product Development

Development in the Genetic Improvement of Producing Strains

Developments in Fermentation Technology

CHAPTER 6

PEPTIDE ANTIBIOTICS

Current Applications of Peptides

Blasticidin S : an Agricultural Antibiotic

Bleomycin and Bestatin: Peptides used in Anticancer Therapy

Cyclosporin: an Immunosuppressor

Structural Types of Peptides

Biosynthesis of Peptide Antibiotics

Ribosomal and Nonribosomal Mechanisms

Reactions Involved in Enzymatic Peptide Formation

Carboxyl Activation

Peptide Bond Formation

Modification Reactions

Production of Peptides
Screening Methods
Biotechnological Production Methods
Improvements and Modification Procedures
Compilation of Peptides
Abbreviations Used in the Table
Alternative Names and Synonyms Compounds Listed in the Table
Appendix

CHAPTER 7

STREPTOMYCIN AND COMMERCIALY IMPORTANT AMINOGLYCOSIDE ANTIBIOTICS

Generalities on Aminoglycoside Antibiotics
Historical Background
Structure of Different Classes of Aminoglycoside Antibiotics
Microbiological Activity and Clinical use
Mode of Action
Problems with Toxicity and Bacterial Resistance
Toxicity
Bacterial Resistance
Streptomycin
Generalities
Physicochemical Properties
Assay and Identification Methods
Assay Methods
Identification Methods
Biosynthesis
Production Technology
Fermentation
Product Recovery
Other Major Aminoglycoside Antibiotics
Screening and Genetic Engineering of Strains for New Aminosides
Screening of new strains
Use of Idiopathic Mutants
Structural Modification of Known Aminosides
Hemisyntesis
Bioconversion
Chemical Synthesis of New Aminosides
Streptothricins, Aminoglycoside-like Antibiotics
Structure
Physicochemical and Biological Properties
Production by Fermentation and Isolation

Uses

Marketing Prospects

CHAPTER 8

CEPHALOSPORINS

Mode of Action of Cephalosporins

Structure and Biosynthesis of Bacterial Cell Wall

Sensitivity and Resistance

Structure/Activity Relationships

Cephalosporin Market

Biosynthesis of Cephalosporins

Biosynthesis Pathway

Regulation of Cephalosporin Biosynthesis

□ γ -Aminoadipic Acid

Valine

Cysteine

Effect of Oxygen Tension

Catabolite Repression

Specific Growth Rate

Fermentation Process

The Fermenter-Its Design and Instrumentation

Fermentation Microbiology

Production Kinetics

Strain Development

Fermentation Development

Alternative Process-DAC Process

Recovery Process

Purification of Cephalosporin C

Cleavage of Cephalosporin C to 7-ACA

CHAPTER 9

COMMERCIAL PRODUCTION OF CEPHAMYCIN ANTIBIOTICS

Cephameycin Product Description

Discovery

Mode of Action

Cefoxitin

Physicochemical Characteristics

Cephameycin C Assay Techniques

Fermentation Microbiology

Introduction

Metabolic Origins

Carbon Metabolism
Nitrogen Metabolism
Sulfur Metabolism
Phosphate Metabolism
Cephamycin Production Technology
Inoculum Development Stage
Antibiotic Production Stage
Isolation and Purification Stage
Conclusions and Implications

CHAPTER - 10

LINCOMYCIN

Discovery
Chemistry
Spectrum
Mode of Action
Lincomycin Assays for Fermentation Development and Production
Production Technology
Lincomycin Biosynthesis
Fermentation
Lincomycin Production by Other Actinomyces Species
Fermentation Power Requirements
Isolation
Chemical Derivatives of Lincomycin
Commercial Markets
Current Manufacturers
Product Outlook

CHAPTER 11

PHARMACOLOGICALLY ACTIVE AND RELATED MARINE MICROBIAL PRODUCTS

Pharmacologically Active Compounds From Marine Microorganisms
Products From the Culture of Microalgae in Coastal Ponds
Agricultural Applications
Conclusions

CHAPTER - 12

ANTICANCER-AGENTS

The Drug Development Process
Market Information
Containment Technology for Cytotoxic Agents
Containment of Process Equipment

Personnel Protection
Decontamination of Waste Streams
Microbial Process Examples
Fermentation Processes for Production of Anthracyclines
Strain Improvement
Batch Fermentation Processes
Isolation and Purification
Fermentation Processes for Production of Nucleosides
Strain Improvement
Batch Production Process
Therapeutic Enzymes
Batch and Continuous Fermentation Processes
Isolation and Purification
Examples of Products of Mammalian Cells in Culture
Interferon Production
Fibroblast Processes (HuIFN- β)
Leukocyte Processes (HuIFN-a)
Lymphoblastoid Processes (Hu Ly, IFN)
Immune Interferon Processes (HuIFN-Y)
Future Technologies: Lymphokines and Monoclonal Antibodies
Summary
Appendix

CHAPTER 13

SIDEROPHORES

The Need for Iron-Solubilizing Agents
The Role of Siderophores
Uptake and Release of Iron from the Siderophore Complex
Production of Siderophores
Conditions for Siderophore Production
Extraction
Adsorption
Ion-exchange Chromatography
Restricted Growth
Protein Binding of Contaminant Iron
Range of Molecular Structures
Hydroxamates
Catecholates (sometimes referred to as phenolates)
Siderophores with Antibiotic Activity
Sideromycins

Interference with Iron Uptake
Siderophore Analogues
Sideromycins
Extraction and Purification of Siderophores
Mycobactin
Enterochelin
Ferrichrome
Commercial Production of Desferrioxamine B (Desferal)
Uses of Siderophores
Iron Metabolism in the Body
Iron Poisoning and Chelation Therapy
Haemochromatosis and Chelation Therapy
Chelation Therapy
Other Medical Application for Siderophores
Applications for Siderophores Outside Medicine
Future Trends

CHAPTER 14

STEROID FERMENTATIONS

Bioconversions of Practical Importance
Bioconversions of Limited or Potential Practical Importance
Progesterone Side Chain Cleavage
Ring A Aromatization
17 and 21-Hydroxylations
Alternative Bioconversion Methods
Sterol Degradation
Steroid Solubility
Methods of Steroid Addition
Steroid Conversion in Organic Solvents
Future Trends in Steroid Bioconversions
Recovery of Steroids
Split Process
Whole-beer Process
Cake-extraction Process
Products of Commercial Importance
Summary

CHAPTER 15

PRODUCTS FROM RECOMBINANT DNA

Production Technology
Methods for Cloning and Expression

Range and Relative Advantages of Host Microorganisms

Stability of Strains and Plasmids

Product Recovery and Purification

Commercial Markets

Markets for Recombinant Products

About Niir

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
