### Description

Spinning is a major industry; it is part of the textile manufacturing process where three types of fibre are converted into yarn, then fabric, then textiles. The textiles are then fabricated into clothes or other artifacts. The fundamental operations for the stocks of fibers from which a woollen yarn is made are opening, cleaning, mixing, forming a slubbing or roving and finally thinning the roving to the required yarn number and twisting it to produce a yarn possessing the requirements for subsequent processing such as warping, winding, weaving, finishing and dyeing. These demands vary with the different conditions confronted in manufacturing but include the following features: strength, elasticity, uniformity in weight per unit length and even distribution of twist. Woollen spinning involves three principal operations, irrespective of whether the mule or the frame or ring spinner is used, namely: Drafting, final drawing out, Twisting, or insertion of twist, Winding on, or packaging. Weaving constitutes the actual production of cloth or fabric, i.e., to combine the essentially one dimensional textile structure thread or yarn in such a way as to result in an essentially two dimensional structure of cloth of certain appearance, hand and strength. Knitting is the art and science of constructing a fabric by inter lacing loops, there are two types of knitting: warp and weft knitting. In recent years whole new classes of dyes such as fiber reactive, disperse, cationic basic, neutral dyeing premetalized have been discovered and produced for the dyeing of the natural and new synthetic, hydrophobic fibers. Bleaching improves whiteness by removing natural coloration and remaining trace impurities from the cotton; the degree of bleaching necessary is determined by the required whiteness and absorbency. Cotton being a vegetable fibre will be bleached using an oxidizing agent, such as dilute sodium hypochlorite or dilute hydrogen peroxide. If the fabric is to be dyed a deep shade, then lower levels of bleaching are acceptable, for example. However, for white bed sheetings and medical applications, the highest levels of whiteness and absorbency are essential. Wool fiber production technology necessitates full understanding of its growth, pristine structure, physical, chemical and functional properties as well as processes involving manufacture of textile fibers.

Some of the fundamentals of the book are woollen spinning, atmospheric conditions in wool manufacturing, Bradford system top gilling or top finishing, the principle of weaving, woollen and worsted weaves, knitting, the changing outlook of the knitting industry, influence of fiber fineness on quantity of dye required, altering the affinity of the wool fiber for dyes, dyeing of yarn according to the packing system, special wool finishes, water repellent, stain resistant treatments for worsted and woollen fabrics, the printing of wool piece goods, lustering of wool fabrics, fluorochemicals, mothproofing etc.

The present book is of its own kind which covers woollen spinning; knitting, dyeing, bleaching and printing, special wool finishes etc. This is an important reference book for wool technologists, scientists, new entrepreneurs, research scholars and all others related to this field.

## Content

### 1. WOOLLEN SPINNING

- Mule Spinning
- The Self-acting Mule
- The Operations of Mule Spinning
- General Mechanical Details
- Production of a Mule
- Standspinner
- Woollen Ring Frame Spinning
- Reduced Balloon“Balloonless Spinning
- Main Technical Data
- Twisting or Yarn Folding
- Woollen Yarn Calculations
- Woollen Yarns
- Yarn Number and Wool Grade
- Yarn Strength
- Wool Blends with Man-made Fibers
- Atmospheric Conditions in Wool Manufacturing

### 2. WORSTED TOPMAKING

- Worsted Carding
- Geelong Converter
- Backwashing
- Dryers
- Top Steaming and Aging
- Oiling
- Gilling or Preparing
- Worsted Combing
- Combs and Combing
- Bradford Worsted Combing
- Principle of Combing
- Punch or Ball Winding
- Operation of the Noble Comb
- Parts of the Noble Comb
- Production of Noble Comb
- Control of Noble Combing
- Bradford System Top Gilling or Top Finishing
- Can Gillbox or Conditioner
- Top Gillbox or Top Baller

French Worsted Combing  
Working Principle of the French Comb  
French Finish Gilling  
Noils

Amount and Type of Noils  
Tow-to-Top Conversion Systems  
Stretch-breaking Methods  
Cutting Methods

### 3. THE PRINCIPLE OF WEAVING

The Essential Motions of a Loom  
Details of Principal Components of Weaving Machinery  
Shedding or Harness Motion  
Let-off Motion  
The Take-up Motion  
Full Width Temples  
Picking Motion  
The Shuttle  
Automatic Stop Motions and Controls  
Warp Stop Motions  
Weft Stop Motion  
Protection Stop Motions  
Weft Pirn Feeler Devices  
Box Motion  
Automatic Filling Replenishment and Multi-colour Weaving  
Box Loader System  
Unifil  
Pirnless Weaving  
The Sulzer Weaving Machine  
Other Development in Weaving Machines

### 4. WOOLLEN AND WORSTED WEAVES

Methods of Describing Weaves  
Use of Design Paper  
The Plain Weave  
Derivatives of the Plain Weave  
The Twill Weave  
Balanced or Even Twills  
Effect of Yarn Twist on Twill  
Steep and Reclining Twills  
Pointed and Herringbone Twills  
Broken or Reversed Twills  
Corkscrew Twills

Inter-locking and Offset Twills  
Undulating Twills  
Diversified, Combination, and Fancy Twills  
The Satin Weave  
The Crepe Weaves  
The Bedford and other Corded Weaves  
Backed and Double Cloths  
Filling-backed Cloths  
Warp-backed Cloths  
Double Cloths  
Montagnacs, Chinchillas, and Felts  
Triple Cloths  
Plushes and Velvets  
Filling Plushes  
Warp Plushes  
Practical Fundamentals of Fabrication and Design  
Construction in Commercial Fabrics  
Maximum Textures of Special Type of Fabrics  
Relative Constructions of New Fabrics  
5. KNITTING  
Principles of Stitch Formation  
Weft Knitting Machines  
Plain, Rib, and Purl Stitches  
Tuck and Miss Stitch Fabrics  
Special Knitted Fabric Design Effects  
The Changing Outlook of the Knitting Industry  
6. DYEING, BLEACHING AND PRINTING  
Modern Dyestuffs  
Designation of Dyes  
Trade Names  
Letter Designations  
Abbreviations and Percentages  
Index Numbers  
Theory of Dyeing  
Wool Dyes  
Acid Dyes  
Chrome dyes  
Metal-complex Dyes  
Metal-complex Dyes  
Vat Dyes  
Solubilized Vat Dyes

Reactive Dyes  
Influence of Fiber Fineness on Quantity of Dye Required  
Some Sources of Faulty Dyeing  
Tippy Dyeing  
Scouring  
Wetting Out  
Mixed Stocks  
Carbonizing and Neutralizing  
Sun-bleached Yarns and Fabrics  
Lime in Pulled Wools  
Effects of Faulty Steaming  
Matching Shades  
Conditioning Samples before Matching  
Feeding Dyes  
Ring Dyeing  
Excessive Crocking  
Chlorinated Wool  
Metal Contaminants  
Stripping Dyed Wool  
Abrasion Marks  
Boiler Compounds  
Machine and Spinning Oils  
The Matching of Shades  
Matching and Shade Control by Instruments  
Low Temperature Dyeing  
Irga Solvent Process  
Collins Process  
C.S.T.R.O. Process  
Chrome Dyes  
Acid Milling and 1:1 Metal-complex Dyes  
Reactive Dyes  
The Dyeing of Wool at High Temperatures  
Ultrasonic Dyeing  
Pad Dyeing Methods  
Cibaphasol Technique  
Irga Pad Process  
C.S.I.R.O. Methods  
Altering the Affinity of the Wool Fiber for Dyes  
Decreasing the Affinity of Wool for Dyes  
Increasing the Affinity of Wool for Dyes  
Bicoloured Tippy Dyeing

Dyeing Wool Mixtures  
Wool and Silk Mixtures  
Wool and Vegetable Fiber Mixtures  
Wool and Man-made Fiber Mixtures  
Wool Dyeing Machinery  
Construction of Dyeing Machines  
Loose-stock Dyeing Machinery  
Top or Slubbing Dyeing Machinery  
Pot or Can Dyeing Machinery  
Continuous Top Dyeing  
The Machine Built by Fleissner  
Segardâ€™Serracant Tunnel Equipment  
Ilma Range  
Konrad Peter Range  
General Experiences  
Yarn-dyeing Machinery  
Dyeing of Yarn According to the Packing System  
Dyeing of Yarn According to the Hanging System  
Dyeing of Yarn According to the Spindle System  
Machines for Drying of the Dyed Materials  
Hank Dryers  
Piece-dyeing Machinery  
Jet Dyeing Machines  
Beam Dyeing  
The Pad-roll Piece Dyeing Machine  
Continuous Woollen Piece Dyeing  
Bleaching Wool  
Hydrogen Peroxide Bleach  
Peroxide â€™Dye-inâ€™ Bleach  
Hydrosulfite Bleach  
Double Bleach  
Continuous Process  
Potassium Permanganate Bleach  
Bisulfite Bleach  
Sodium Chlorite Bleach  
Optical Bleaching Wool  
Bleaching and Dyeing in One Bath  
Effect of Stabilizers  
Anti-yellowing Treatment  
Vigoureux or Melange Printing  
The Printing of Wool Piece Goods

Pretreatment  
Acid Dyes  
Basic Dyes  
Direct Dyes  
Vat Dyes  
Soluble Vat Dyes  
Oxidation Colours  
Spray Printing  
7. SPECIAL WOOL FINISHES  
Introduction  
Flat Setting  
Setting with Monoethanolamine Sulfite Solutions  
Permanent Press  
Lustering of Wool Fabrics  
Luster on Pile Fabrics  
Mechanism  
Luster on Clear Finished Worsteds  
Stretch Fabrics  
Stretch Yarns  
Inducing Yarn Crimp during Weaving  
Yarn Crimp Development, Interchange and Chemical Setting  
Finishing Helanca Ski Cloth  
Water Repellent, Stain Resistant Treatments for Worsted and Woollen Fabrics  
Silicones  
Chromium Compounds  
Fluorochemicals  
Mothproofing

## About Niir

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases,

detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
