## Nanoscience and Nanotechnology Habbbook

<b>Code</b>	NI225
<b>Format</b>	paperback
<b>Indian Price</b>	₹1675
<b>US Price</b>	\$150
<b>Pages</b>	608
<b>ISBN</b>	9788178331263
<b>Publisher</b>	Asia Pacific Business Press Inc.

### Description

Nanotechnology is the engineering of functional systems at the molecular scale. In its original sense, nanotechnology refers to the projected ability to construct items from

the bottom up, using techniques and tools being developed today to make complete, high performance products. In this rising world of rapid technological developments, the role of state of art materials & composites is pivotal in frontier applications like aerospace, aviation, automobile, defense, electronics, chemical, biomedical, energy & nuclear sectors etc. with the advent of 21st century & initiation of Nanotechnology the atomic & molecular structures of materials is redefined. This shall result in new smart materials namely nanoparticles, powder, wires, rods, carbon nano tubes & so on. Nanotechnology is very diverse, ranging from novel extensions of conventional device physics, to completely new approaches based upon molecular self-assembly, to developing new materials with dimensions on the nanoscale, even to speculation on whether we can directly control matter on the atomic scale. Potential of nanotechnology to manipulate and program matter with atomic precision has invited the attention of scientists to explore innumerable applications of nanotechnology was an inspiration for the benefit of researchers, academicians and industries associated with this field. The global market for nanotechnology products is worth an estimated compound annual growth rate (CAGR) of 11.1% from 2010 to 2015. The largest segment of the market, made up of nanomaterials, is expected to increase at a 5 year CAGR of 14.7%.

This book basically deals with design of protein based nanomachines, metastabilities in nanocrystalline, nanoscale characterization of nanowires, thermopower measurements on nickel nanowires, a nanoporous tio<sub>2</sub> electrode, nanoscale in investigation of ultrathin, silicone oxide thermal decomposition, cylindrical nanodot arrays, nanocrystalline silicon films, dispersion of carbon nanotubes, electrical conductivity study of nanocomposite films, magnetic properties of nanospheres, generation spectroscopy of nanoparticle monolayer, au nanoparticles on light emitting polymers, etc.

This handbook deals with the technology frontiers, its applications, the current & future challenges etc. This book will be an invaluable resource to all academicians, industrialists, scientists, upcoming entrepreneurs & technocrats.

## **Content**

### PREFACE

### 1. DESIGN OF PROTEIN BASED NANOMACHINES

#### Introduction

Renowned Nanomachines of the Biological Cell Confirm Engineering Principles and Inspire Nanomachine Design

De Novo Design of Diverse Elastic-Contractile Protein Machines

Hydrophobic and Elastic Consilient Mechanisms: Definitions

Hydrophobic Consilient Mechanism and the Inverse Temperature Transition  
The Elastic Consilient Mechanism and the Nature of Near Ideal Elasticity  
Coupled Hydrophobic and Elastic Consilient Mechanisms  
Principal Thermodynamic Quantities Controlling Diverse Energy Conversions in Model Proteins  
The Change in Gibbs Free Energy for Solubility,  $\Delta G(\text{solubility}) = \Delta H - T\Delta S$   
The Change in Gibbs Free Energy for a Phase Transition  
The Change in Gibbs Free Energy for an Inverse Temperature Transition  
Apolar-Polar Repulsive Gibbs Free Energy of Hydration,  $\Delta G_{\text{ap}}$   
Calculations of the Entropic Elastic Force and Energy  
Biology's Protein-based Nanomachines Confirm the Hydrophobic and Elastic Consilient Mechanisms  
The Three Classes of Energy Conversion Within the Cell  
Complex III of the Electron Transport Chain Within the Inner Mitochondrial Membrane  
ATP Synthase of the Inner Mitochondrial Membrane  
The Myosin II Motor of Muscle Contraction  
Confirmation of the Hydrophobic and Elastic Consilient Mechanisms  
Designing Protein-based Nanomachines Using the Hydrophobic and Elastic Consilient Mechanisms  
Design of an AFM-Based Stress-Strain Nanomachine for the Detection of a Single Molecular Event  
Use of the 3 kHz Mechanical Resonances in the Design of an AFM-Based Nanomachine for Detection of Interactions at Fixed Length  
An Additional Opportunity in the Deciphering of Engineering Principles for the Design of Protein-Based Nanomachines

## 2. METASTABILITIES IN NANOCRYSTALLINE SILICON

Experimental Procedure  
Results  
Discussion  
Conclusion

## 3. INTERACTION OF SULPHURIC ACID WITH GRAPHENE

Sulphuric Acid in Gas and Solid Phases  
Sulphuric Acid on Graphene  
Conclusions

## 4. NANOSCALE CHARACTERIZATION OF NANOWIRES

Experimental Methods  
Nanowire Morphology, Periodicity and Diameter  
Chemical Analysis of the CoPt/Pt Nanowires

Structural Analysis of the CoPt/Pt Nanowires

Discussion

Conclusions

## 5. THERMOPOWER MEASUREMENTS ON NICKEL NANOWIRES

Experimental Details

Results and Discussion

Structural Characterization of the NWs

Initial Characterization of the Measurement Device

## 6. MULTI-WALLED CARBON NANOTUBE EMITTERS EXPERIMENT

Fabrication of CNT Cathode

Experimental Structures

Current-Voltage Characteristics

Simulations

Simulated Structures

Predicted  $I$ - $V$  Characteristics

Cathode Support Structure Geometry

Conclusion

## 7. VIBRATION OF A CARBON NANOTUBE

The Model for a CNT filled with a C-chain

Vibration of a CNT filled with a C-chain

Axisymmetric Radial Breathing Vibration ( $n = 0$ )

Coupled Vibration with  $n = 1$

Vibration of Higher-order Modes ( $n > 2$ )

Conclusions

## 8. A NANOPOROUS TiO<sub>2</sub> ELECTRODE

Experimental Details

Preparation of the ILSE Films

Characterization of the ILSE Films

Electrode and DSSC Fabrication Containing the ILSE

Electrode Characterization

Results and Discussion

Conclusions

## 9. FREEZING BEHAVIOUR OF AN NANOMETER-SIZED Au DROPLET

Numerical Simulations

Results and Discussion

Conclusions

## 10. NANOSCALE IN INVESTIGATION OF ULTRATHIN SILICONE OXIDE THERMAL DECOMPOSITION

Experimental Details

Results and Discussion

High Temperature STM in situ Observation of the Thermal Decomposition Process

Individual Void Growth Kinetics at the Initial Decomposition Stage

Decomposition Rate Variation and Rate Limiting Steps

Morphology Effects on the Decomposition Process

Conclusions

## 11. CARBON NANOTUBE FIELD-EFFECT

TRANSISTOR

Methodology

Results and Discussion

Conclusions

## 12. CYLINDRICAL NANODOT ARRAYS

System and Units

Theoretical Model

Vortex-core Magnetization

Total Energy Calculation

Results and Discussion

Conclusions

## 13. SUPERELASTICITY OF ENGINEERING

CERAMICS BY NANOTUBES

Experimental Details

Results and Discussion

Conclusion

## 14. POROUS ANODIC ALUMINA

Experimental Details

Results

Initial Specimens and Anodizing

Film Morphology

Film Composition

Discussion

Conclusions

## 15. METAL NANOCLUSTERS IN GLASS

Experimental Procedure

Results and Discussion

Ion-Beam Mixed Ag in Silica

Ion-Exchanged Ag in Soda Lime Glass

Conclusion

## 16. LIGHT EMISSION FROM NANOCOMPOSITES

Experiments

Results and Discussion

Conclusion

## 17. NANOCRYSTALLINE SILICON FILMS

Experimental Details

Results

Optical Absorption Study

X-ray Diffraction Study

Infrared Absorption Study

Raman Study

Electron Microscopy

Discussion

Conclusion

## 18. CARBON NANOTUBES IN CHEMICAL VAPOUR DEPOSITION

## 19. NANOSCALE DEEP INDENTATION

Simulation Methodology

Results and Discussion

Conclusion

## 20. REDUCTION OF NANOWIRES

Experimental Details

Results and Discussions

Summary and Conclusion

## 21. DISPERSION OF CARBON NANOTUBES

Experimental Details

Purification and Dispersion of MWCNTs

Preparation of Nanocomposite Films

Carbon Nanotube Dispersion Study in Solution and in Nanocomposite Films

Electrical Conductivity Measurement

Results and Discussion

MWCNT Dispersion in Solution

Nanocomposite Preparation and Carbon Nanotube Distribution in Composite Films

Electrical Conductivity Study of Nanocomposite Films

Conclusion

## 22. CREATION OF CARBON ONIONS AND COILS

Experimental Details

Result and Discussion

Conclusions

## 23. MAGNETIC PROPERTIES OF NANOSPHERES

Experimental Details

Results and Discussion

Conclusion

## 24. LUMINESCENCE OF CRYSTALS NANORODS

Experimental Section

Results and Discussion

Conclusions

## 25. NANONECKLACE MORPHOLOGY

Experimental Details

Growth of Cu-Pt Nanoparticles

Growth of Cu-Pt Nanonecklace Nanowires

Conclusions

## 26. OPTICAL PROPERTIES OF NANODOT ARRAYS

Experimental Details

Results and Discussion

Conclusions

## 27. GENERATION SPECTROSCOPY OF NANOPARTICLE MONOLAYER

Experimental Section

Materials

Synthesis of AuNPs

Synthesis of Dense AuNPs Monolayer

Dodecanethiol SAM Formation

Characterization

SFG Set-up

Results and Discussion

Conclusions

## 28. CHEMICAL DOPING WITH CARBON NANOTUBES

Experimental Details

Results and Discussion

Summary

## 29. DIRECT-WRITE PROGRAMMING OF NANOSCALE DEMULTIPLEXER ARRAYS

## 30. POLY(N-ISOPROPYLACRYLAMIDE) NANOPARTICLES

Introduction

Experimental Details

PNIPAM-coated Fe<sub>3</sub>O<sub>4</sub>@SiO<sub>2</sub>@CdTe Nanoparticles and ZnPcS Loading

Biological Systems

PL and Fluorescence Measurements

ZnPcS Released from the Nanoparticles in PBS Solution

ZnPcS Released from the Nanoparticles in the CHO Cells

Results and Discussion

ZnPcS Embedded in the PNIPAM of Nanoparticles

Release of ZnPcS from the ZnPcS-loaded Nanoparticles in PBS Solution

Release of ZnPcS from the ZnPcS-loaded Nanoparticles in CHO Cells

Release of ZnPcS from the ZnPcS-loaded Nanoparticles in Zebra Fish  
Movement of the Nanoparticles in Zebra Fish by the Magnetic Field Gradient  
Phthalocyanines and PDT  
Conclusion

### 31. COBALT FERRITE NANOPARTICLES

Experimental Details

Synthesis

Characterization Methods

Results and Discussion

Fundamental Characteristics, Crystallite size Versus Coercivity and Remanence

Mossbauer Spectra and Distribution of Cations

Heating Efficiency from Calorimetric Measurements and ac

Hysteresis Loops

Conclusions

### 32. Au NANOPARTICLES ON LIGHT-EMITTING POLYMERS

Experimental Section

Measurements

Device Fabrication and Characterization

Materials

Synthesis of PDOFT-bis-4-thiol

End-capping at AuNP onto PDOFT-bis-4-thiol (PDOFT-Au 10, PDOFT-Au15, PDOFT-Au 20 and PDOFT-Au 30)

Results and Discussion

Synthesis and Characterization

Photophysical Properties

Electroluminescent Properties and Current Density-Voltage-Luminescence (J-V-L)

Characteristics of the PLED Devices

Conclusions

### 33. CARBON NANOSTRUCTURE BASED NANOCOMPOSITES

Experimental Details

Results and Discussion

Conclusions

### 34. Au NANOPARTICLE CHAINS

Experimental Results and Discussion

Sample Preparation and Measuring System

General Considerations on Dielectrophoresis

Dielectrophoresis on Flat Substrates

Dielectrophoresis on V-groove-etched Substrates

Discussion of Results on Patterned Substrates, Electric Field Numerical Calculation

CONCLUSION

### 35. GOLD-SILICA NANOCOMPOSITES

## 36. NANOPINS BY CHEMICAL VAPOUR DEPOSITION

Experimental Section

Preparation

Characterization

Results and Discussion

Conclusions

## 37. OXIDATION RESISTANT METAL NANOPARTICLES

Experimental Details

Thermo-Gravimetric Studies

Particle Size Reduction

Synthesis and Coating of Metal Nanoparticles

Results and Discussion

Thermo-Gravimetric Analysis

Fluidized Bed Processing

Particle Size Reduction

Passivation of Metal Nanoparticles by in situ ALD

Conclusions

## 38. MOLECULAR CARBON-ONIONS

Experimental Details

Discussion of Results

Conclusion

## 39. ATOMIC SCALE MANIPULATION

Tip-Surface Interaction

Experimental Response

Discussion and Conclusion

## 40. SILICONE NANOWIRES

Experimental Session

Results and Discussion

Conclusion

## 41. CARBON NANOFIBERS

Experimental Details

Results

Discussion and Conclusion

## 42. SINGLE-CRYSTALLINE NANOWIRES

Experiments

Results and Discussion

Conclusion

## 43. SILICONE OXIDE NANOSTRUCTURES

Experimental Details

Results and Discussion

Conclusion

#### 44. A SQUARE TITANIUM NANOMESH

Experimental Details

Results and Discussion

Conclusions

#### 45. NANO-POROUS ANODIC ALUMINIUM OXIDE MEMBRANES

Experimental Details

Results and Discussion

Conclusions

#### 46. Co NANOPARTICLES

Experimental Section

Materials

Synthesis and Assembly of Cobalt Nanoparticles

Characterization

Results and Discussion

Conclusions

#### 47. ZERO-BIAS CONDUCTANCE OF GOLD MOLECULAR JUNCTION

Methodology

Results and Discussion

Conclusion

#### 48. ALL-INKJET-PRINTED ELECTRONICS OF METAL NANOPARTICLES

Fabrication and Experimental Details

Nanoparticle Solution Preparation

Semi-conducting Polymer Preparation

Organic Field Effect Transistor Fabrication Process and Characterization (Inkjet Printing of Nanoparticle Solution, Polymer Dielectric Layer and Semi-conducting Polymer)

Results and Discussion

Nanoparticle Sintering Characterization

OFET Characterization

Summary

#### 49. TRIODE TYPE CARBON NANOTUBE FIELD EMITTER

Experimental Details

Results and Discussion

Conclusions

#### 50. PROTEIN AND POLYMER IMMOBILIZED NANOPARTICLES FOR BIOMEDICAL APPLICATIONS

Methodology

Chemicals and Materials

Experimental Set-up

Analyses

Results and Discussion

Protein Estimation  
Conjugation Studies  
Magnetic Studies  
Microscopy Studies  
Cytotoxicity Studies  
Leaching Studies  
Hyperthermia Studies  
Conclusion

## 51. 3D STRUCTURES OF NANOWIRES

Methods  
Nanowire Growth  
TEM Characterization  
Image Simulations  
Result  
Crystal Structure  
Image Simulations  
Discussion  
Summary

## 52. SUPERIOR CONDUCTIVITY OF NANOPARTICLES

Experimental Details  
Synthesis of Nanocomposites  
Characterization  
Results and Discussion  
Conclusions

## 53. STRUCTURAL AND ELECTRONIC PROPERTIES OF ZnO NANOTUBES

Computational Method  
Results and Discussion  
Conclusions

## 54. SYNTHESIS OF NANOCRYSTALLINE CERAMIC POWDERS

Experimental Procedure  
Results and Discussion  
Nanocrystalline CeO<sub>2</sub> Powders Through Glycine-Nitrate and Citrate-Nitrate Combustion  
Auto-Ignition Synthesis of Monophasic BaTi<sub>4</sub>O<sub>9</sub> and Ba<sub>2</sub>Ti<sub>9</sub>O<sub>12</sub> Powders  
Combustion Synthesis of TbO<sub>2</sub>, and MTbO<sub>3</sub> (M = Ba and Sr)  
Conclusions

## 55. NANOCCLUSERS ON POLYMER SURFACES

Organization of Nanoparticles on the Polymer Matrices: Why?  
Nanoclusters Organization on Polymers: How?  
Electrostatic Organization  
Covalent Organization

Vander-Waals Organization  
Different Preparation Strategies  
Nanocomposites Versus Surface Functionalisation  
Selection of Polymers  
Selection of Clusters  
Metallic Nanoclusters  
Semi-conducting Nanoclusters  
Characterisation Techniques  
Selected Applications  
Catalytic Applications  
Photovoltaic Applications  
Biological Applications  
Limitations of Cluster Organization on Polymers  
Conclusion

## About Niir

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
