The Complete Book on Gums and Stabilizers for Food Industry

Code	NI231
Format	paperback
Indian Price	₹1275
US Price	\$125
Pages	480
ISBN	9788178331317
Publisher	Asia Pacific Business Press Inc.

Description

Gums are plant flours (like starch or arrowroot) that make foods & other products thick. Gums are used in foods for many reasons besides being used as a thickener. Gums are important ingredient in producing food emulsifier, food additive, food thickener & other gum products. The main reason for adding a gum or hydrocolloid to a food product is to improve its overall quality. India is the largest producer of gums specially guar gum products. Similarly stabilizers are an indispensable substance in food items when added to the food items, they smoothens uniform nature and hold the flavouring compounds in dispersion. Gum technology stabilizers are carefully controlled blends of various food ingredients. Most processed foods need some sort of stabilization at some point during production, transportation, storage and serving. The science and technology of hydrocolloids used in food and related systems has seen many new developments and advances over recent years. The breadth and depth of knowledge of gums and stabilizers has increased tremendously over the last two decades, with researchers in industry and academia collaborating to accelerate the growth. Gums as food constituents or as food additives can influence processing conditions in the following ways; retention of water, reduction of evaporation rates, alteration of freezing rates, modification of ice crystal formation and participation in chemical reactions.

Some of the fundamentals of the book are functions of gum, typical food applications, gums in food suspensions, rheology and characters of gums, natural product exudates, flavor fixation, ice cream, ices and sherbets, gelation of low methoxyl pectin, seaweed extracts, microbial gums, transformation of collagen to gelatin, cellulose gums, dairy food applications, bakery product applications, analysis of hydrocolloids, gums in food products, general isolation of gums from foods, identification of gums in specific foods, group analysis and identification schemes, group identification methods, qualitative group analysis etc.

This book contains rheology of gums, plant sheet gums, microbial gums, cellulose gums and synthetic hydrocolloids different stabilizers used in food industry. The book will be very resourceful to all its readers, new entrepreneurs, scientist, food technologist, food industries etc.

Content

1. FUNCTIONS OF GUM

Convenience Foods

Instant Coffee

Frozen Foods

Freeze-Dried Foods

Gum Constituents

Effect on Processing

Pertinent Processing Parameters
Function in Food Applications
Viscosity
Definition and Meaning
Factors Effecting Hydrophilic Viscosities
Typical Food Applications
Gelation
Mechanism of Gel Formation
Types of Gel Linkage
Gel Textures
Effect of Sugar on Gels
Rheological Behavior
Gel-Enhancing Effect of Other Gums
Emulsification and Stabilization
Types of Emulsions
Preparation of Emulsions
Applications of Hydrocolloids
Breaking of Emulsions
Suspensions and Dispersions
Description
Yield Value
Gums in Food Suspensions
Foams
Description
Requirements for Stability
Food Applications
Measurement of Foam Stability
Crystallization Control
Description
Types of Crystal Bonding
Effect of Hydrocolloids
Flavor Fixation
Description
Historical Background
Basic Principles
Function of Gums
Important Parameters
Advantages of Gum Arabic
Limitations of Spray-Dried Flavors
Slab Fixation
Microencapsulation (Coacervation)

Alginate Film Encapsulation

Protective Films

Description

Applications

Synergistic Effect

Syneresis Inhibition

Selection and Application of Hydrocolloids

2. RHEOLOGY AND CHARACTERS OF GUMS

Background

Definitions

Viscosity

Newtonian Flow

Non-Newtonian Systems

Bingham Plastic

Pseudoplastic (Shear-Thinning)

Dilatancy (Shear-Thickening)

Thixotropic Flow

Rheopexy

Rheology in Foods

Flow Curve Data

Rheological Measurement of Liquids

Capillary Viscometers

Rotational Viscometers

Brookfield Synchro-Lectric Viscometer

Corn Industries Viscometer

Brabender Visco-Amylograph

Validity of Measurements

Rheological Measurements of Solids

Parameters of Solids

Food Gel Systems

Types of Gel Measurements

Bloom Gelometer

Exchange Ridgelimeter

Gel Characterization Apparatus (GCA)

Description

Advantages

Interpretation of Measurements

Typical Gel Measurements

Texturometer

3. NATURAL PRODUCT EXUDATES

Origin of Gums

Physical Properties

Gum Arabic

Standards

Structure

Properties

Confectionery

Bakery Products

Dairy Products

Beverages

Flavor Fixation

Miscellaneous

Gum Ghatti

Structure and Properties

Applications

Gum Karaya

Structure

Properties

Ice Cream, Ices and Sherbets

Meat Products

Baked Goods

Dairy Products

Miscellaneous

Gum Tragacanth

Structure

Properties

Salad Dressings and Sauces

Ice Cream, Ices and Sherbets

Bakery Products

Confectionery

Miscellaneous

4. PLANT SEED GUMS

Locust Bean Gum

Historical Background

Botany

Source

Structure

Properties

Applications

Guar Gum

Historical Background

Source

Structure
Properties
Applications
Psyllium Seed Gum

Source
Structure
Properties
Applications

Quince Seed Gum
Source

Structure
Properties
Applications

5. PECTINS

Nomenclature
Function in Plants
Structure
Properties
Viscosity

Low Methoxyl Pectins

Gel Formation

Theoretical Discussion

Sugar

Setting Time

Gel Strength

Gelation of Low Methoxyl Pectin

Manufacture of Pectin

Process

Standardization

Manufacture of Low Methoxyl Pectins

Uses of Pectin

Jams, Jellies and Preserves

Critical Parameters

Canned Fruits and Fruit Juices

Confectionery Products

Dairy Products

Miscellaneous

Uses of Low Methoxyl Pectins

Dessert and Pudding Mixes

Canned Fruit Sauce Gels

Canned Tomato Aspic

Frozen Foods
Soda Fountain Fruit Toppings
Variegated Ice Cream
Fruit Pie Fillings
Beverages
Edible Protective Coatings

6. LARCH GUM

Structure
Properties
Viscosity
Surfactant Properties
Refractive Index and Specific Gravity
Adhesive and Binding Properties
Shelf-Life Stability
Food Additive Status
Food Applications

7. SEAWEED EXTRACTS

Botany
Historical Background
Structure
Agar
Historical Background
Collection of Agar Weed
Processing
Structure
Properties
Applications
Carrageenan
Background
Production
Structure
Properties
Applications
Furcellaran
Background
Structure
Properties
Applications
Alginates
Background
Sources

Processing

Structure

Properties

Applications

8. MICROBIAL GUMS

Dextran

Background

Production

Structure

Properties

Applications

Polysaccharide B-1459 (Xanthan Gum)

Background

Preparation

Structure

Properties

Toxicity

Food Applications

Polysaccharide B-1973

Structure

Preparation

Properties

Deacetylated Polymer

Phosphomannan Y-2448

Preparation

Structure

Properties

Rheological Behavior

Applications

Polysaccharide Y-1401

Structure

Preparation

Properties

Rheological Behavior

9. GELATIN

Background

Collagen

Transformation of Collagen to Gelatin

Manufacture of Gelatin

Sources

Processing

Final Products
Chemical Composition
Amino Acids
Ash
Metal Content
Sulfur Dioxide Content
Organic Additives
Physical Properties
Solubility
Viscosity
Color
Turbidity
Gel Strength (Bloom)
Protective Colloid Action
Emulsion Stabilizer
Preservation
Gelling Properties and Mechanism
Gel Structure Hypotheses
Gelation of Gelatin
Phenomena Related to Gelling Mechanism
Applications
Gelatin Desserts
Confections
Ice Cream Stabilizers
Dairy Products
Meat Products
Bakery Goods
Food Coatings
Flavor Fixation
Miscellaneous
10. CELLULOSE GUMS
Cellulose Derivatives
Microcrystalline Cellulose
Properties
Food Applications
Pharmaceutical and Cosmetic Applications
Food and Drug Administration Status
Sodium Carboxymethylcellulose (CMC)
Background
Properties
Dairy Food Applications

Bakery Applications
Salad Dressings, Sauces, and Gravies
Confectionery
Dietetic Foods
Processed Foods
Packaged Dry Mixes
Food Preservation Applications
Miscellaneous
Legal Status
Methylcellulose and Hydroxypropylmethyl-cellulose
Preparation
Properties
Bakery Product Applications
Dietetic Foods
Dehydrated Foods
Frozen Foods
Salad Dressings
Breading Batters
Edible Film Applications
Legal Status
Hydroxypropylcellulose (Klucel)
Properties
Food Applications
Food and Drug Administration Status
Methylethylcellulose
Properties
Applications
Food and Drug Administration Status
Other Cellulose Derivatives
Hydroxyethylcellulose (HEC)
Ethylcellulose (EC)
Ethylhydroxyethylcellulose (EHEC)
Carboxymethylhydroxyethylcellulose (CMHEC)

11. SYNTHETIC HYDROCOLLOIDS

Polyvinylpyrrolidone (PVP)
Background
Properties
Food Applications
Carboxyvinyl Polymers (Carbopol)
Background
Properties

Applications

Methyl Vinyl Ether/Maleic Anhydride Polymers (Gantrez AN)

Background

Properties

Applications

Ethylene Oxide Polymers (Polyox)

Background

Preparation

Properties

Applications

12. ANALYSIS OF HYDROCOLLOIDS

Examination of Industrial Gums

Commercial Gums

Water Solubility Properties

Alcohol Precipitability Characteristics

Microscopic Identification

Flocculation Values

Gums in Food Products

General Isolation of Gums from Foods

Identification of Gums in Specific Foods

Group Analysis and Identification Schemes

Group Identification Methods

Qualitative Group Analysis

Analysis by Quaternary Ammonium Salt Reactions

Cetavlon Group Identification Scheme

Classification by Cobalt Complex Precipitation

Additional Analytical Methods

Infrared Spectroscopy

Paper Chromatography

Electrophoresis

X-Ray Diffraction

Differential Thermal Analysis (DTA)

Reagents for Gum Identification

About Niir

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project

Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
