The Complete Technology Book on Starch and Its Derivatives

Code	NI81
Format	paperback
Indian Price	₹1100
US Price	\$125
Pages	540
ISBN	8178330733
Publisher	Asia Pacific Business Press Inc.

Description

Starch is a group of poly saccharides, composed of glucopyranose units joined together by glucosidric linkages. Starch is also metabolized for energy in plants and animals, and is used to produce a large number of industrial products. Starch is processed to produce many of the sugars in processed foods. The biggest industrial non food use of starch is as adhesive in the paper making process. Other important fields of starch application are textiles, cosmetic and pharmaceutical uses. Starch can be obtained from maize, sorghum, roots and tubers such as tapioca, arrow root, potatoes etc. Starch truly serves as a multifunctional ingredient in the food industry. Starch is one of the most present biomaterials has witnessed significant developments over the years. By products are obtained in the manufacture of different types of starch such as maize gluten has a number of interesting possible uses in industry, zein (by product of corn processing) is used in the preparation of stable glass like plastics, modification of zein is used as adhesives and in the preparation of coating compositions for paper, the most important by product from wheat starch manufacture is gluten which is used in preparing diabetic foods, for feeding cattle, thickening agent in textile printing and so on. The Global starch market is likely to get respite from deceleration in its market growth, with growth poised to receive a new lease of life in the next few years.

This book basically illustrates about the properties, structures, manufacturing process explained with flowcharts and diagrams, applications of starch and its derivatives etc. The major contents of the book are structure and chemical properties of starch, chemical composition, molecular structure, starch granule properties, water sorption and granule swelling as a function of relative humidity, factors affecting starch paste properties, the oxidation of starch etc.

This is a unique book, concise, up to date resource offering a valuable presentation of the subject. This book contains processes of starch and its derivatives. This book is an invaluable resource for new entrepreneurs, industrialists, consultants, libraries.

Content

1. Structure and Chemical Properties of Starch

Structure and Properties

Chemical Composition

Molecular Structure

Starch Granule Properties

Water Sorption and Granule Swelling as a
Function of Relative Humidity

Factors Affecting Starch Paste Properties

2. The Swelling And Gelatinisation of Starch

The Swelling of Starch
The Gelatinisation of Starch
The Use of Swelling Agents to Study Gelatinisation
Methods of Following the Course of
 Gelatinisation of Starch : Optical Methods
Methods Depending on Viscosity
The Effect of Injury to Starch Granules before
 Gelatinisation on the Properties of the Pastes
Viscosity and Structure
The Rigidity of Starch Pastes
3. The Role of the Minor Constituents of Starch
The Role of Phosphorus in Starch
The Formation of 'Werner Complexes'
The Adsorption Theory
The Amylophosphoric Acid Theory
The Significance of Nitrogen in Starch
The Coacervation Theory
Fatty Acids Present in Certain Starches
Other Acids Present in Starch as Esters
4. The Retrogradation of Starch
'Retrogradation' of Starch by Freezing
'Retrogradation' by Solvents
Monomolecular Dispersion
Complete Retrogradation
The Explanation of Retrogradation
Practical Significance of Retrogradation in Industry
The Prevention of Retrogradation
Reactions with Formaldehyde
5. Starch and the Hydrogen Bond
6. The Reaction of Starch with Iodine
The Effect of Heat
Sensitivity of the Reaction
An Abnormal Starch-Iodide Reaction
The Composition of Starch Iodide
Use of Starch Iodide
The Starch-Iodide Reaction in the Spectro-photometric
 Determination of Starch
7. Root Starches
Manufacture of Potato Starch
Refining the Starch
Drying the Starch

Some Difficulties Occurring in the Manufacture of Potato Starch

Cassava Starch or Brazilian Arrowroot

The Manufacture of Sweet-Potato Starch

8. Cereal Starches

The Manufacture of Wheat Starch

Manufacture of Maize Starch

Early Process. Extracting the Starch

Treating the Starch

Drying

Modern Process

Rice Starch

9. The Oxidation of Starch

OXIDATION OF STARCH IN ACID MEDIA

Oxidation by Nitric Acid

Oxidation by Ammonium Nitrate

Oxidation by Chromic Acid

Oxidation by Permanganates

Oxidation by Hydrogen Peroxide

Oxidation by Halogens

Oxidation by Oxy-halogen Acids

Oxidation by other Per-compounds

Oxidation by Oxides in Acid Solution

Oxidation by Irradiation

Oxidation by Air in Acid Solution

Oxidation by Ozone

OXIDATION OF STARCH IN ALKALINE MEDIA

Oxidation by Hypohalites

Oxidation by Alkaline Chlorite

Oxidation by Alkaline Aktivin

Oxidation by Alkaline Permanganates

Oxidation by Alkaline Peroxides

Oxidation by Air in Alkaline Solution

Electrolytic Oxidation

Oxidation by Alkaline Mercuric Oxide

Oxidation by Alkaline Persulphates

OXIDATION OF STARCH IN NEUTRAL MEDIA

Oxidation by Bromine

Oxidation by Iodine

10. Glucose and Maltose

The Manufacture of Glucose

Raw Materials

Earlier Process
The More Recent Process
The Crystalline Forms of Anhydrous Dextrose and
Dextrose Hydrate
Producing Anhydrous Dextrose
Uses of Glucose
The Manufacture of Maltose
11. Ethyl Alcohol and Acetone
The Manufacture of Ethyl Alcohol
The Amylo Process
The Production of Acetone
12. Dextrin and British Gums
Methods of Manufacture
Raw Materials
The Choice of Acid
Pre-treatment of Starch before Torrification
Main Steps in Dextrin Manufacture
Addition of Catalyst
Maturing the Starch
Drying the Starch before Roasting
The Roasting Process
Cooling and Re-moistening the Dextrin
Grinding and Bagging-off Operations
Conversion of Starch to Dextrin by the Wet Process
Acid Conversion in the Wet Process
The Conversion using Enzymes
13. Modified Starches
Physical Treatment to Modify Starch
14. Adhesives from Starch and Dextrin
Purpose and Applicability
The Application of Adhesives
Theoretical Considerations
Flour Pastes
Adhesives from Starch
Treatment with Caustic Alkalies
Treatment with other Alkaline Substances
Treatment with Acids
Treatment with Salts
Treatment with Oxidising Agents
Treatment of Starch with Swelling Agents
Addition of Various Compounds to Starch Adhesives

Dextrin Adhesives

15. The Foodstuff Industry

Potato Products in the Food Industry

Importance of the Storage History of Potatoes

Colour of Potato Chips

Cooking other than Frying

The Gelatinisation of Starch

The Effect of Various Factors on Gel-Strength of Starch Pastes

Uses of Starch on Various Foodstuff Preparations

Starch in the Baking Industry

Moisture Absorption by Dough

The Influence of Other Physical Properties of
Starch on Baking Quality

The Diastatic Activity of Flours

The Chemistry of certain Baking Faults

16. The Paper Industry

ENGINE SIZING

Tub Sizing

Coated Papers

Miscellaneous

17. The Textile Industry

Sizing of Yarns

Sizing

Considerations influencing Sizing

Mechanical Properties of Starch Films and
Sized Cloths Arranged in Order of Decreasing Magnitude

The Effect of Auxiliary Agents on the
Properties of Sizes and Finishes

Desizing

Enzymes

The Use of Enzymes in Desizing

The Finishing of Textile Fabrics

Adhesive Dressings

Characteristics of Individual Starches

Wheat Flour

Tinting and Blueing Agents

The Suitability of Starches and Dextrins

The Printing of Textile

Function of the Thickener

Colour Value

Starch Products used for Thickenings

Disadvantages attendant on the Use of Starch Thickenings

Thickenings of British Gums

18. Miscellaneous Uses of Starches and Dextrins

The Soap Industry

Laundry Starches

Cosmetic and Pharmaceutical Uses

Horticultural Uses

Fire-Proofing Preparations

Explosives and Fuels

Some Unclassified Uses

19. Utilisation of the By-Products of Starch Manufacture

20. Antiseptic Agents and Preservatives

21. General Features and Nomenclature of Amylases

Occurrence

Composition

22. Preparation of Enzymes used in the Starch Industry

Enzymes from Malt

Preparation of Individual Malt Enzymes

Enzymes from Moulds or Fungi

Enzymes from Animal Juices

Bacterial Enzymes

23. The Action of α -Amylase on Starch

Soluble Starch

HYDROLYSIS OF STARCH BY α -AMYLASE

α -amylodextrin

Amyloamylose

Erythro Bodies

α - and β -Glucosides

The Mode of Action of α -amylase

24. Analysis of Starch and its Derivatives

General Methods of Analysis

ANALYSIS OF CORN STARCH

ANALYSIS OF STARCH DERIVATIVES

ANALYSIS OF STARCH HYDROLYZATES

Dextrose

Saccharide Contents of Acid-Converted Starch Hydrolyzates

Reducing Sugars

School Method : Conversion of Titer Difference to Reducing Sugar

Assay by Specific Gravity

Conversion of Commercial Degrees Baumé to % Dry

Substance for Commercial Corn Syrups and Dextrose Solutions

Trace Components

Calcium

Copper

Iron

Chloride

SULFATE

ANALYSIS OF FEED PRODUCTS

Starch

Crude Fiber

Lactic Acid

Xanthophylls

ANALYSIS OF CORN OIL

Iodine Value

Peroxide Value

Free Fatty Acids

Color

Cold Test

Smoke Point

25. List of Material Suppliers

List of Chemical Suppliers

LIST OF MACHINERY / EQUIPMENT SUPPLIERS

About Niir

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
