The Complete Technology Book on Chemical Industries

Code	NI89
Format	paperback
Indian Price	₹975
US Price	\$100
Pages	443
ISBN	8178330687
Publisher	Asia Pacific Business Press Inc.

Description

In modern age chemical industries have permeated most extensively in comparison with other industries and are progressing at a very rapid pace. Chemical Industry in India is one of the fastest growing industries under the Indian economy. The chemical industry comprises the companies that produce industrial chemicals. Central to the modern world economy, it converts raw materials into more than 70,000 different products. Chemicals have contributed in various sectors like food industry, fertilizers, perfumery, fragrance and flavour etc. Chemicals are used to make a wide variety of consumer goods, as well as thousands inputs to agriculture, manufacturing, construction, and service industries. There are numerous chemicals produced in chemical industry for example chloroform, caffeine, fertilizers , dyes, drug intermediates, herbicide, inorganic salts, copper sulphate, acetaldehyde etc. The chemical industry itself consumes 26 percent of its own output. The Chemical Industry in India is based on the idea of diversification. For example inorganic chemicals is the sector where the growth rate is near about 9% and the chemicals produced in this sector are mainly used in alkalis, fertilizers, etc. Depending on the product categories the chemical industry is divided in many other sectors like drugs and pharmaceuticals, fertilizers, fine chemicals like dyes and paints etc. The chemical industry in India which generates almost 13% of total national export is growing annually at a growth rate anywhere between 10% and 12%.

This book majorly deals with the molecular formula, raw materials, properties, laboratory testing, manufacturing process explained with flow diagrams and uses of the chemicals. The major contents of the book are inorganic salts, inorganic chemicals, industrial gas, fertilizers, alum, caffeine, ceramic chemicals etc. This book covers the production of more than 100 chemicals for example acetanilide, methylamine, butylamine, linalol, phosphorous, salicylic acid etc.

This book should be of great value to young chemical engineers and chemists who are just entering the field but those already practicing will find much of interest and use for broadening of their insight in to fields in which they are only marginally informed. It is hoped that this book will aid to young engineers, chemical, civil, mechanical and electrical as well as chemists, in understanding the value of chemical, the type of problems met in their production and method for solving these problems.

Content

1. 2-Chloro-6(Trichloromethyl)-Pyridine

Introduction

Classification

Uses and Applications

Industrial Prospect

Formulations
Process of Manufacture
Laboratory Testing
Determination of Pyridine Content
Apparatus
Test Substances
Procedure
Chart Speed
Calculation

2. Alkylamines

Methylamine
Ethylamine
Propylamine
Isopropylamine
Butylamine
Isobutylamine
Amylamine
Monoethanolamine
Diethanolamines
Triethanolamine
Manufacturing Process
Reaction
Uses
Grades
Toxicity
Polypropylene
Manufacturing Process
Hercules Polypropylene Process
Uses
Grades
Polyethylene
Manufacturing Process
From Ethylene by Low-Pressure Polymerization
(Phillips Process)
Uses
Grades
Toxicity
Vinyl Acetate
Manufacturing Process

3. Alum

Introduction

Raw Material Requirements

Reactions

Process of Manufacture

Uses

Plant & Machinery

Market Potential

Plant Economics

Analytical Testing of Ammonium Alum

EDTA Method

Reagents

Procedure

Calculation

Gravimetric Method

Laboratory Testing of Aluminium Sulphate

Introduction

Procedure

4. Bleaching Powder

Introduction

Properties

Properties

Uses

Process of Manufacture

Laboratory Testing

Glacial Acetic Acid

Calculation

5. Caffeine (C₈H₁₀N₄O₂.H₂O)

From Tea Waste

Raw Material Requirements

Process

Properties

Purity

Reagents and Apparatus

Standardization

Procedure A : (Potentiometric)

6. Ceramic Chemicals

Boric Acid

Properties
Manufacturing Process
Reaction
Flow Diagram
Uses
Grades
Toxicity

7. Chemical and Additive for Food Industry

Citric Acid
Properties
Lactic Acid
Molecular Formula
Manufacturing Process
Sodium Bicarbonate
Manufacturing Process

8. Chloroform (Trichloromethane) CHCl_3

Chloroform
Molecular Formula
Properties
From Methane by Chlorination
Material Requirements (Theoretical)
Process
From Acetone and Bleaching Powder
Reaction
Material Requirements
Process
Grades
Purity
Determination of Relative Density
Apparatus
Procedure
Calculation
Determination of Distillation Yield
Apparatus
Assembly of the Apparatus
Procedure

9. Chloram Phenicol (p)(-)-Threo-1-(Para-nitrophenyl)- 2-dichloroacetamide-1, 3-propanediol

Reaction
Raw Material Requirements
Manufacturing Process
Properties
Grades
Purity

10. Coumarin (C₉H₆O₂)
From Salicylaldehyde
Reaction
Properties
Grades
Use & Application
Process of Manufacture
Laboratory Testing
Apparatus
Coumarin
Procedure
Reaction with Iodine Solution

11. Construction Material
Lime (Calcium Oxide)
Properties
Manufacturing Process
Hydrated Lime
Chemical Lime
Reaction
Flow Diagram
Uses
Grades
Toxicity

12. Corrosion Inhibitor
Sodium Dichromate
Manufacturing Process
From Chromite Ore
Reaction
Flow Diagram
Uses
Grades
Toxicity

13. Drug Intermediates & Pharmaceuticals

Acetanilide

Molecular Formula

Properties

Manufacturing Process

Reaction

Uses

Specification of Commercial Graders

Toxicity

14. Dry Cleaning Solvent

Perchloroethylene

Molecular Formula

Properties

Manufacturing Process

Reaction

Flow Diagram

Uses

16. Ester Gum
Field of Applications

- Classification
- Manufacture
- Laboratory Testing
- Reagents
- Driers
- Procedure
- Determination of Gel Time
- General
- Reagents
- Procedure

17. Fatty Acids

- Properties
- Manufacturing Process
- Raw Material Requirement
- Reaction
- Flow Diagram
- Uses
- Grades
- Toxicity

18. Fertilizers

- Introduction
- Nutrition requirements of crops
- Overview of the fertilizer industry
- Nitrogen Fertilizers
- Miscellaneous low-volume nitrogen fertilizers
- Nitrogen fertilizers from synthetic ammonia
- Phosphate Fertilizers
- Natural Organic Phosphate Fertilizers
- Fertilizers from Mineral Phosphates
- Potassium Salts
- Potassium Minerals
- Potassium-Magnesium Minerals
- Potassium Sulfate
- Potassium Nitrate
- Potassium Phosphates
- Mixed Fertilizers
- Nongranular Mixtures
- Compound Granulars
- Bulk Blends

Fluid Mixtures

19. Gaur Gum (Galactomannan Gum)

From Guar Seeds (Dry Process)

24. Inorganic Salts

Aluminium Chloride

Properties

Manufacturing Process

From Aluminium Metal and Chlorine

Raw material requirements

Reaction

Uses

Grades

Toxicity

Ammonium Chloride

Properties

Manufacturing Process

From ammonium sulphate and sodium chloride

Raw material requirements

Reaction

Uses

Grades

Toxicity

Ammonium Nitrate

Properties

Manufacturing Process

From Ammonia and Nitric Acid

Raw Material Requirements

Barium Carbonate

Properties

Manufacturing Process

From Barium Sulphide and Carbon Dioxide

Raw material requirements

Reaction

From Barium Sulphide and soda Ash

Raw material requirements

Reaction

Uses

Grades

Toxicity

Copper Sulphate

Properties

Manufacturing Process

From Cupric Oxide and Sulphuric Acid

Raw material requirements

Reaction

Uses

Grades

Toxicity

Uses

Grades

Toxicity

Ferrous Sulphate Heptahydrate

Properties

Manufacturing Process

From Steel Pickling Liquor

Raw material requirements

Reaction

Uses

About Niir

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our

publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
