## Integrated Organic Farming Handbook

<b>Code</b>	NI248
<b>Format</b>	paperback
<b>Indian Price</b>	₹1275
<b>US Price</b>	\$33.95
<b>Pages</b>	472
<b>ISBN</b>	9788178331522
<b>Publisher</b>	Asia Pacific Business Press Inc.

### Description

Organic agriculture has grown out of the conscious efforts by inspired people to create the best possible relationship between the earth and men. After almost a century of

neglect, organic agriculture is now finding place in the mainstream of development and shows great promise commercially, socially and environmentally. Integrated organic farming is a commonly and broadly used word to explain a more integrated approach to farming as compared to existing monoculture approaches. It refers to agricultural systems that integrate livestock and crop production and may sometimes be known as Integrated Bio systems. It denotes a holistic system of farming which optimizes productivity in a sustainable manner through creation of interdependent agri-eco systems where annual crop plants (e.g. wheat), perennial trees (e.g. horticulture) and animals (including fishes where relevant) are integrated on a given field or property .This concept of organic farming is based on following principles: 1. Nature is the best role model for farming, since it does not use any inputs nor demand unreasonable quantities of water.2. The entire system is based on intimate understanding of nature's ways of replenishment. The system does not believe in mining of the soil of its nutrients and do not degrade it in any way. 3. The soil in this system is considered as a living entity 4. The soil's living population of microbes and other organisms are significant contributors to its fertility on a sustained basis and must be protected and nurtured, at all cost. 5. The total environment of the soil, from soil structure to soil cover is more important and must be preserved.

Integrated Organic farming is a method of farming system, which primarily aims at cultivating the land and raising crops in such a way, so as to keep the soil alive and in good health. It is the use of organic wastes (crop, animal and farm wastes, aquatic wastes) and other biological materials, mostly produced insitu- along with beneficial microbes (bio fertilizers) to release nutrients to crops, which connotes the 'organic' nature of organic farming. It is also termed as organic agriculture. In the Indian context it is also termed as 'Javik Krishi'. We have compiled all the relevant information regarding integrated organic farming in this book. This is first book of its kind which contains reliable details related to organic farming, green manuring, biological nitrogen fixation, uses of vermiculture bio-tech, organic fertilizers for flooded rice ecosystem, biological pest management, press mud as plant growth promoters, bio fertilizer for multipurpose tree species, rice- fish integration, response of crops to organic fertilizer and many more.

The book is very useful for farmers, agriculture, universities, consultants and research scholars.

## **Content**

1. NECESSITY OF ORGANIC FARMING
- Management of Autonomous Ecosystem
- Mixed Farming
- Plants

Animals  
Soils  
Biosphere  
Crop Rotation  
Benefits of Crop Diversification  
Organic Cycle Optimization  
In Partnership with Nature  
Basic Standards and General Principles for Organic Agriculture  
Crop and Soil Management  
Choice of Crops and Varieties  
Crop Rotations  
Fertilization Policy  
Management of Pests, Diseases and Weeds  
Wild Products  
Pollution Control  
Soil and Water Conservation  
Landscape  
Principle Requirements and Pre-conditions  
Conversion from Conventional to Organic Farming  
Farms with Plant Production and Livestock  
Limitations  
Initiating Organic Farming  
Medicinal Plants-the First Crops for Organic Farming  
Management of Permaculture Farm  
Permaculture Farm  
Use of Draft Animal  
Making Permanent Farm  
Conservation of Soil  
Protection of the Soil against Fires  
Protection form Water Erosion  
Protection from Wind Erosion  
Improvement of the Soil  
How to Bury Organic Matter  
Mixed Cropping  
Permaculture for Wastelands  
Soil and Water Conservation  
Pioneers  
Pioneer Trees and Plants  
Secondary Species  
Conclusion

## 2. GREEN MANURING—A BASIC COMPONENT OF

## ORGANIC FARMING

Definition

Objectives of Green Manuring

Subsidiary Objective of Green Manures

Catch Crops

Shade Crops

Cover Crops

Forage Crops

Advantages of Green Manuring

Soil Structure and Tilt Improvement

Fertility Improvement of Soils

Amelioration of Soil Problems

Improvement in Crop Yield and Quality

Pest Control

Classification of Green Manures

Legumes

Non-Legumes

Characteristics Desirable in Legume Green Manure Crops

Leguminous Green Manures

Non-Conventional Green Manures

Other Green Manures

Choice of Green Manure Species

Forms of Green Manuring

Agronomy of Green Manure Crops

*Sesbania Speciosa*

*Sesbania Aculeata* {Dhaincha}

*Sesbania Rostrata*

*Crotalaria Juncea* (Sunnhemp)

*Tephrosia Purpurea* (Wild Indigo)

*Indigofera Tinctoria*

*Calapogonium Mucunoides*

*Phaseolus Trilobus* (Phillipesara)

*Centrosema Pubescens*

*Macroptilium Atropurpureum* (Siratoo)

*Stylosanthes Hamata*

*Pueraria Phaseoloides* (Kudzu)

*Dolichos Lab Lab* var. *Lignosus*

Agronomy of Green Leaf Manure Shrubs and Trees

*Glyricidia* (*Glyricidia Maculata* Syn. *G. sepium*)

*Ipomoea Cornea*

*Cassia Auriculata*

Derris Indica (Syn. Pongamia Glabra)  
Azadirachta Indica (Neem)  
Thespesia Populnea  
Rhizobial Inoculation  
Conditions for Fixation of Nitrogen  
Bacterial Inoculation of Legumes  
Stage of Incorporation  
Time of Incorporation  
Method of Application of Green Manure  
Decomposition of Green Manure  
Aerobic Decomposition  
Changes in the Carbon Compounds  
Changes in Nitrogen Compounds  
Changes in the Mineral Constituents  
Anaerobic Decomposition  
Carbon Nitrogen Ratio on Decomposition Process  
Farmer Acceptance of Green Manuring  
Limitations in Raising Green Manure Crops  
Conclusions  
Future Needs

### 3. BIOLOGICAL NITROGEN FIXATION

Definition  
Symbiotic and Non-Leguminous Symbiotic System  
Azotobacter  
Beijerinckia  
Azospirillum  
Application  
Other Bacteria  
Blue Green Algae  
Multiplication  
Trough Method  
Pit Method  
Field Method for Large Scale Production  
Limitations  
Azolla  
Nursery  
Azolla Application Methods  
Green Manuring  
As Dual Crop  
Efficiency of Azolla  
Limitations

Frankia  
Legume-Rhizobium Symbiosis  
Methods of Application  
Seed Inoculation  
Pelleting  
Other Symbiotic Nitrogen Fixing Systems  
Other Bioinoculants  
Phosphate Solubilising Microorganisms (PSM)  
Vesicular Arbuscular Mycorrhiza (VAM)  
Inoculation Methods  
Transplanted Crops  
Direct Sown Crops  
Seed Coating  
Pelleting  
Fluid Drilling  
Furrow Inoculation  
Precropping  
Plant Growth Promoting Rhizobia (PGPR)  
Conclusion  
Future Needs

#### 4. APPLICATION OF VERMICULTURE BIOTECHNOLOGY

Vermiculture Biotechnology  
Earthworm for Nutrient Management  
Effect on Soil Fertility  
Nitrogen  
Phosphorus  
Potassium  
Earthworms for Water Management  
Earthworm Castings  
Earthworms Act as Biopump  
Earthworms for Effective Waste Management  
Composting of Municipal and Industrial Wastes  
Earthworms for Disease and Pest Management  
Earthworms for Nutritional Crops  
Earthworms for Sustainable Agriculture and Wasteland Development  
Earthworms as Vectors of Beneficial Microorganisms  
Successful Applications  
Harnessing Vermiculture Biotechnology  
Selection of Proper Species  
Use of Vermicastings for Inoculation

Earthworms and Land Use Practices  
Effect of Organic Manure and NPK Fertilizers on Earthworm Activity  
Cultivation  
Mulching  
Irrigation  
Biocides  
Procedure to Prepare Vermicompost  
Culturing Technique  
Culture Bed  
Feed Composition  
Feed Application  
Wormcast Production and Collection  
Application of Vermicompost  
Conclusion  
Future Research Needs

## 5. ORGANIC FERTILIZERS FOR FLOODED RICE ECOSYSTEM

Azolla  
Growth and N-Fixation  
Factors Affecting Growth and N-Fixation  
Management Practices  
Impact on Rice Yield and Soil Fertility  
Economic Aspects  
Suitable Agroclimatic Conditions  
Adoption Constraints and Future Research Needs  
Blue-Green Algae (BGA)  
Nitrogen Fixing Potential and N-input  
Factors Affecting Growth and N-fixation  
Management Practices  
Impact on Rice Yield and Soil Fertility  
Economic Aspects  
Suitable Agroclimatic Conditions  
Adoption Constraints and Future Research Needs  
Conclusions

## 6. PHOSPHATE SOLUBILIZING MICROORGANISMS : FUNGI AND BACTERIA

Problems in Phosphorus Uptake  
Phosphate Fixation in Different Soils  
Historical Developments  
Phosphate Solubilization  
Factors Affecting Phosphate Solubilization

Isolation

Mechanisms of Action

Role of Acids

Other Mechanisms

Effect on Crop Yield

7. PHOSPHATE SOLUBILIZING MICROORGANISMS :

MYCORRHIZAE

Mycorrhizal Types and Their Structural and Nutritional Features

Ectomycorrhizae

Mechanism of ECM Formation

Morphology and Structure

Synthesis of Mycorrhiza

Cultural Study

Vesicular Arbuscular Mycorrhiza

Introduction

Evolution

Taxonomy

Classification

Distribution

Lifecycle

Reproduction

Sexual Reproduction

Asexual Reproduction

Method of Inoculum Production of VAM

Some Important Steps in Production of VAM

Host Plant/Growth Medium

Fertilizations/Micronutrients

Chemical Application

Control of Fungal Pathogens

Plant-Vesicular Arbuscular Mycorrhizal Fungal Interactions

Vam and Soil Biota

Control of Root Diseases

Endomycorrhiza and Plant Disease

Ectomycorrhizal Fungi and Tree Diseases

Mechanism of Disease Control

Outlook

8. APPLICATION AND EVALUATION

Different Methods for Biofertilizer Inoculation

Seed Inoculation

Top Dressing of Biofertilizers

Granular Biofertilizers

Solarisation of FYM/Compost  
Granular Biofertilizer Mixed with Seed  
Broadcasting of Granular Biofertilizers  
Frequency of Inoculation  
Liquid Inoculation of Biofertilizers  
Methods of Application of Liquid Inoculation  
Drenching By Sprayers  
Application in Root Zone  
Culture Pellet  
Methods of Application of Other Biofertilizers  
Blue Green Algae  
Azolla  
As Green Manuring  
Azolla Dual Cropping  
Azotobacter  
Preparation and Use of Azotobacter Inoculant  
Application  
Azospirillum  
Mycorrhizae  
Endomycorrhizae  
Ectomycorrhizae  
Techniques for Isolation of Vesicular Arbuscular Mycorrhizal Fungi (VAMF) from Soil in Laboratory  
Gerdemann and Nicolson Technique  
Sutton and Barron Flotation Technique  
Method for Examination of Mycorrhizal Infection in Root Samples  
Foliar Biofertilizer  
Humar  
Humic Acid  
Introduction  
Application  
Soil  
Foliar  
Seed Treatment  
Soil Benefit  
Root  
Seeds  
Plants  
Precautions  
Different Media Used to Study Biofertilizer  
I. Growth Media for Rhizobium

Media for Testing Nodulating Ability of Rhizobium

Jenson's Plant Nutrient

II. Isolation Of Frankia

III. Selective Media For Blue Green Algae

IV. Selective MEDIA For Azotobacter

V. Selective Media for Azospirillum

VI. Selective Media for Phosphate solubilizing organisms

VII. Selective Medium for isolation of Pseudomonas fluorescens, a biocontrol agent (Subba Rao, 1986).

VIII. Selective medium for isolation of Trichoderma - an antagonistic fungus.

## 9. BIOLOGICAL PEST MANAGEMENT

Cultural Control

Sanitation

Tillage

Application of Manures and Soil Amendments

Habitat Diversification

Crop Rotation

Trap Cropping

Intercropping

Strip Farming

Time of Planting

Water Management

Crop Competition

Physical and Mechanical Control

Manual Control

Burning

## 20. RICE SOILS IN COASTAL—AREA SUSTAINABLE SOIL NUTRIENT IN ORGANIC RICE FARMING

Organic Farming—the Truths vs. Myths

Organics as a Source of Plant Nutrients

Organic Farming and Food Security

Organic Farming—A Lesson from China

Biodynamic Farming

System of Rice Intensification (SRI)

Conclusions

## 21. UTILIZATION OF BENEFICIAL MICROORGANISMS FOR SUSTAINABLE ORGANIC RICE PRODUCTION

Biological Nitrogen Fixers

Legume - Rhizobium symbiosis

Azospirillum

Different Methods of Application of Azospirillum in the Field

Cyanobacteria (Blue Green Algae - BGA)

Mass Production of BGA in the Field

Anabaena - Azolla Symbiosis

Utilization of Azolla for Rice

Mass Production of Azolla in the Field

Phosphorus Solubilising Microorganisms

Arbuscular Mucorrhizal Fungi (AMF)

Silicate Solubilising Bacteria

Zinc Solubilising Bacteria

Plant Growth Promoting Rhizobacteria (PGPR)

Efficacy of PGPR in Rice

Methods of Application of Pseudomonas Fluorescens in Rice

Microbial Consortium for Rice

## 22. BIOGAS POTENTIAL FROM WASTES AND ITS VALUE

Manurial Value of Digested Slurry

## 23. RECYCLING OF ORGANIC MATERIALS AS ORGANIC FERTILIZERS

Direct Incorporation of Organic Materials in Soil and Their Effects

Maintenance of Organic Matter in Indian Soils

Effect of Organic Matter on Soil Microorganisms

Organic Mulch

Effect of Crop Residues on Yield of Legume Crops

Effect of Straw, Neem Cake and Farmyard Manure on Yield of Maize Crop

Effect of Incorporation of Organic Matter on Paddy Crop

Influence of Humic Substances on Crop Yields

## 24. RESPONSE OF CROPS TO ORGANIC FERTILIZERS

Farmyard Manure and Compost

Oil-Cakes

Long-Term Effect of Organic Manures

Effect of Organic Manures in Rotation

Manurial Requirements of a Fixed Crop Rotation

Rice-Wheat Rotation  
Rice-Rice Rotation  
Maize-Wheat Rotation  
Jowar-Wheat Rotation  
Bajra-Wheat Rotation  
Rotation-Jowar in Kharif-Bajra in Rabi  
Response of Crops to Bone-Meal

## **About Niir**

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
