Manufacture of Thinners & Solvents (Properties, Uses, Production, Formulation with Machinery Details) 2nd Edition

Code	NI306
Format	paperback
Indian Price	₹1875
US Price	\$150
Pages	296
ISBN	9789381039960
Publisher	NIIR PROJECT CONSULTANCY SERVICES

Description

Solvents are defined as chemicals compound that are introduced during manufacture of the paint itself and before packaging, in order to maintain all components of the paint in a liquid / viscous state such as we know it. A solvent is usually a liquid but can also be a solid or a gas. Solvents find various applications in chemical, pharmaceutical, oil, and gas industries, including in chemical syntheses and purification processes.

Thinners are defined as chemical compounds that are introduced into the paint prior to application, in order to modify the viscosity and other properties related to the rate of curing that may affect the functionality and aesthetics of the final layer painting.

Paint thinner, a solvent used in painting and decorating, for thinning oil-based paint and cleaning brushes. A Thinner may be a single solvent or a combination of solvent types. Often, specific thinners are required by the manufacturer of a coating to prevent damage to coating properties that may occur when an inappropriate thinner is used. Solvents (for cleaning up or softening) and Thinners (for diluting or extending) are useful not only in painting but in other areas such as Wooden Furniture industry, Automobile industry, Ink industry, Rubber industry.

As the paint industry is a major consumer of Thinners & Solvents, and is expanding at a tremendous speed, it is very obvious that the demand of thinners, too, will increase tremendously. The paints & coatings accounts for the largest share in the aliphatic hydrocarbon Thinners & Solvents market. It is also projected to be the fastest-growing application of the aliphatic hydrocarbon Thinners and Solvents market.

The book contains Properties, Uses, manufacturing of Thinners & Solvents and providing information regarding thinner formulation. It also covers raw material suppliers, photographs of plant & Machinery with supplier's contact details. Some of the fundamentals of the book are thinner in Paint Industry, Health and Safety Measures of Chemicals, Pollution Control, Waste Disposal of Hazardous Chemicals and Storage, Labelling and Packaging of Chemicals etc.

It will be a standard reference book for professionals and entrepreneurs. Those who are interested in this field can find the complete information from manufacture to final uses of Solvents and Thinners. It will be very helpful to consultants, new entrepreneurs, technocrats, research scholars, libraries and existing units.

Content

Table of Contents

1. SOLVENTS

Classification of Solvents

Boiling Points

Rates of Evaporation

Polarity

Industrial Applications

Use

Chemical Composition

I. Organic Solvents

II. Inorganic Solvents

Chemical Structure

Behavior Toward Magdala Red

2. APPLICATION OF SOLVENTS

3. PROPERTIES OF SOLVENTS

Introduction

Molecular Weight

Boiling Point

Freezing Point

Density

Liquid Expansion Coefficient

Surface Tension and Absolute Viscosity

Flash Point and Explosive Limits

Autoignition Temperature

Electrical Conductivity

Immediate Danger to Life and Health

4. ENVIRONMENTAL, HEALTH AND SAFETY REGULATION

Fire/Explosive Peroxide Formation

Health Effects

Ways Solvents Can Enter Your Body

Absorption

Swallowing

What Are the Warning Signs?

Acute Poisoning

What to Do

Chronic Poisoning After Years of Repeated

Exposures, the Typical Later Effects are

What to Do

How Solvents Affect the Skin

What to Do

How Much Exposure is Bad for You?

Environmental Contamination

Duties of Employers and Employees

Material Safety Data

Training

5. MANUFACTURING PROCESS OF SOLVENT

6. USES OF SOLVENT IN VARIOUS INDUSTRIES

Adhesives and Sealants

Common Use of Adhesive in Various Industry

Sealants

Common Use of Sealants in Various Industry

Aerospace

Acetone

Alcohol

Benzene

Methyl Ethyl Ketone (MEK)

Methylene Chloride

Toluene

Turpentine

Mineral Spirits

Naphtha

Linseed OilAsphalt Compounding

Biotechnology

Biotransformation Using Solvent-Tolerant

Microorganisms

Solvent-Resistant Microorganisms

Process of Solvent Toxicity for Microorganisms

Choice of Solvent for Enzymatic Reaction in

Organic Solvent

Low Water Systems

Classification of Organic Solvents

(1) Water-Miscible Organic Solvents

(2) Water-Immiscible Organic Solvents

(3) Water-Insoluble Organic Solvents

Classification of Solvents Commonly Used for

Enzymatic Reactions in Organic Media

Properties of Enzymes Affected by Organic Solvents

Thermal Stability (Half-Life), $t_{1/2}$

Specificity and Selectivity, K_{cat}/K_m

Coil Coating

Cosmetics and Personal Care Products

Electronic Industry
Cleaning in Electronics Manufacturing
Factors Affecting Cleaning
Dry Cleaning
Drycleaning Solvents
Petroleum Drycleaning Solvents
Dry Cleaning Processes
Solvent Storage Tanks
Detergents
Process of Cleaning
Textile Finishing
Waterproofing
Milling
Antistatic Finishing
Fabricated Metal Products
Machining Operations
Metal Parts Cleaning and Stripping
Solvent Cleaning
Aqueous (Alkaline and Acid) Cleaning and Stripping
Abrasive Cleaning and Stripping
Water Cleaning
Waste Streams
Food Industry
Mechanical Extraction
Solvent Extraction
The Solvent Extraction Process
Flow diagram of Oilseed Extraction Process
Review of Solvents Studied for Extraction Efficiency
Iron Steel Industry
List of Solvents Released from the Iron and Steel Industry
Uses of Solvent in Ship Industry
Cleaning Operations Using Organic Solvents
Pulp and Paper

Printing Industry
Pharmaceutical Industry

7. ACETONE

Uses

Older Production Methods

Uses of Acetone

Uses of Acetone in Cosmetics

Uses of Acetone in Laboratory

Uses of Acetone in Electronics

Uses of Acetone in Domestic Purpose

Acetone Manufacturing Process

Production

Wacket-Hechst Direct Oxidation of Propene

Co-production in Hock Phenol Process

8. CITRUS TERPENES

Properties of TerpenoidsCitrus Terpenes for Cleaning

d-Limonene

Manufacturing Process

9. ETHYL ACETATE

Production

Formula and Structure

Applications

Technical Overview

Production of Ethyl Acetate

10. INDUSTRIAL ALCOHOL

Introduction

Manufacture

1. Bymalt Fermentation

Manufacture Process

11. TETRACHLORETHYLENE

Manufacturing Process

Chlorination of Ethylene Dichloride

Physical and Chemical Properties

Structural and Molecular Formulae and Relative

Molecular Mass

12. TOLUENE (METHYL BENZENE)

Structure and Formula

Various Manufacturing Process of Toluene

Alternate Catalytic Reforming Processes

Physical and Chemical Properties of Toluene

13. TURPENTINE

Extraction of Turpentine from the Wood Chips

Uses

1. Increases Efficacy of Paints and Varnish
2. Cleaning Agent
3. Stain Remover
4. Healthier Choice of a Solvent
5. Works Well as a Furniture Polish
6. Eco-Friendly

The Turpentine Value Chain

14. SOLVENT RECYCLING, REMOVAL AND DEGRADATION

Introduction

Process Description and Emissions

General Processes in Solvent Recycling Operations

Solvent Recycling Operations

Solvent Storage

Solvent Handling

Initial Treatment

Typical Fixed-Bed Activated Carbon Solvent

Recycling System

Distillation and Purification

Distillation Process for Solvent Recycling

Spills

Equipment Leaks

Emission Estimation Techniques: Acceptable

Reliability and Uncertainty

Direct Measurement

Mass Balance

Engineering Calculations

Emission Factors

15. SOLVENTS MARKET

Industrial Solvent Market

Green Solvent and Bio-Solvents Market

16. THINNERS

Introduction

Uses of Thinners

Types of Thinner Used in industries

Types of Thinner Based on the Paint with which it is Mixed

17. MANUFACTURING PROCESS

Thinner Formulation

18. FORMULATION OF THINNERS

Epoxy Thinner

Composition of Ingredients

Handling and Storage

Physical and Chemical Properties

Paint Thinner

Composition of Thinner

Handling and Storage

Precautions to Be Taken in Handling

Precautions to be Taken in Storing

Physical and Chemical Properties

Acrylic Thinner

Composition/Information on Ingredients

Handling and Storage

Physical and Chemical Properties

Varnish Thinner

Composition/Information on Ingredients

Handling and Storage

Handling Precautions

Incompatible Materials

Storage Conditions

Physical and Chemical Properties

19. THINNER IN PAINT INDUSTRY

Odorless Paint Thinner

Requirements of the Thinners

Functions of the Thinners

Properties of Paint Thinner

Solvents Used as Paint Thinners Include

Other Solvents Sometimes Used in the Production of Paint Thinners Include

20. HEALTH AND SAFETY MEASURES OF CHEMICALS

Health Hazards

Solvents – Thinners
How to Control Health Hazards Environmental Control
Use Appropriate Personal Protection
Respirators
Eye and Hearing Protection
Protective Clothing
Handling and Storage
Accidental Release Measures
Precautions
Spill or Leak
Do Not Get Water Inside Containers
Fire and Explosion Hazards
Things to Do and Not to do Before Mixing Thinner in Paint
Material Safety Data Sheet
What is a Material Safety Data Sheet (MSDS)?
What is the Purpose of an MSDS?
What information is on the MSDS?
Reactivity Data
Why is an MSDS Hard to Read?
When Would We Use an MSDS?
Hazard Communication Standard
Solvents

21. POLLUTION CONTROL

Environmental Concerns
Pollution Caused by Thinner
Major Emissions
Impacts on Human Health and Environment
What is Pollution Prevention?
Methods for Reducing the Pollution

22. WASTE DISPOSAL OF HAZARDOUS CHEMICALS AND STORAGE

General Requirements for Storage of Chemicals
Prohibited and Restricted Hazardous Chemicals
Exposure Standards
Identifying Hazards Hazardous Chemicals Generated or Manufactured in the Workplace
Segregate Incompatibles
Segregate Families

Flammable Liquid Storage
Classifications of Flammable and Combustible

- Liquids
 - Flammable Liquids
 - Combustible Liquids
 - Corrosive Storage
 - Transporting Chemicals
 - Hazardous Waste Disposal
 - General Requirements for Waste Disposal
 - Standard of Containers
 - Containers to be Resistant to the Contents
 - Containers should be in Good Condition
 - Containers to be Securely Closed
 - No Mixing of Incompatible Wastes in a Container
 - Sufficient Air Space in Containers When Storing Liquid Wastes
 - Disposal of Paint Related Materials
 - Hazardous Waste Minimization
 - Process Level Impacts

23. B.I.S. SPECIFICATIONS OF SOLVENTS AND THINNERS

- Solvents
- Thinner

24. LABELLING AND PACKAGING OF CHEMICALS

- Introduction
- General Requirements of Labelling and Packaging in Accordance with the Chemical Labelling & Packaging (CLP) Regulation
- General Labelling Rules
- Elements of the CLP Hazard Label
- CLP Labelling Requirements Versus Discretion of the Supplier Classification of Hazardous Substance/Mixtures
- Updating the Hazard Label
- Labelling of Workplace Chemicals
- Hazard Labels for Supply and Transport Outer and

- Inner Packaging Classified for Supply but not for Transport
- Outer and Inner Packaging Classified for Both Transport and Supply
- Single Packaging Classified Under Both Supply and Transport
- CLP Rules on Packaging of Substances and

Mixtures
Child-Resistant Fastening and Tactile Warnings of
Danger
Child-Resistant Fastening (CRF)
Tactile Warning of Danger (TWD)
Hazard Pictograms
Shape, Colour and Dimensions
Precedence Rules
Blank Pictograms
Signal Words
Hazard Statements
Precautionary Statements
Codes for Hazard and Precautionary Statements
Code Ranges of Hazard and Precautionary
Statements Under CLP
Guidance on Particular Aspects of CLP Hazard
Labelling
Further Aspects to Consider for the CLP Hazard
Label
Size of the Label and of the Label Elements
Minimum Dimensions of Labels and Pictograms Under CLP

25. PROCESS FLOW DIAGRAM

27. PHOTOGRAPHS OF MACHINERY WITH SUPPLIER'S CONTACT DETAILS

About Niir

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases,

detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
