# **Epoxy Resins Technology Handbook (Synthesis, Epoxy Resin Adhesives, Epoxy Coatings) with Manufacturing Process and Machinery Equipment Details (3rd Edition)**

<b>Code</b>	NI346
<b>Format</b>	paperback
<b>Indian Price</b>	₹2275
<b>US Price</b>	\$200
<b>Pages</b>	592
<b>ISBN</b>	9788195370153
<b>Publisher</b>	Asia Pacific Business Press Inc.

## Description

Epoxy is a term used to denote both the basic components and the cured end products of epoxy resins, as well as a colloquial name for the epoxide functional group. Epoxy resin are a class of thermoset materials used extensively in structural and specialty composite applications because they offer a unique combination of properties that are unattainable with other thermoset resins.

Epoxies are monomers or prepolymers that further reacts with curing agents to yield high performance thermosetting plastics. They have gained wide acceptance in protecting coatings, electrical and structural applications because of their exceptional combination of properties such as toughness, adhesion, chemical resistance and superior electrical properties. Epoxy resins are characterized by the presence of a three membered cycle ether group commonly referred to as an epoxy group 1, 2-epoxide, or oxirane. The most widely used epoxy resins are diglycidyl ethers of biphenyl-A derived from biphenyl-A and epichlorohydrin.

The market of epoxy resins are growing day by day. Today the total business of this product is more than 100 crores. Epoxy resins are used for about 75% of wind blades currently produced worldwide, while polyester resins account for the remaining 25%. A standard 1.5-MW (megawatt) wind turbine has approximately 10 tonnes of epoxy in its blades. Traditionally, the markets for epoxy resins have been driven by demand generated primarily in areas of adhesives, building and civil construction, electrical insulation, printed circuit boards, and protective coatings for consumer durables, amongst others.

The major contents of the book are synthesis and characteristics of epoxy resin, manufacture of epoxy resins, epoxide curing reactions, the dynamic mechanical properties of epoxy resins, physical and chemical properties of epoxy resins, epoxy resin adhesives, epoxy resin coatings, epoxy coating give into water, electrical and electronic applications, analysis of epoxides and epoxy resins and the toxicology of epoxy resins and photographs of machinery with suppliers contact details.

A total guide to manufacturing and entrepreneurial success in one of today's most epoxy resin industry. This book is one-stop guide to one of the fastest growing sectors of the epoxy resin industry, where opportunities abound for manufacturers, retailers, and entrepreneurs. This is the only complete handbook on the commercial production of epoxy resin product. It serves up a feast of how-to information, from concept to purchasing equipment.

## Content

Table of Contents

## 1. Synthesis and Characteristics of Epoxy Resin

Introduction

Structure of Epoxides

Epoxidation of Unsaturated Hydrocarbons

Catalytic Oxidation of Ethylene and Higher Olefins

Epoxidation by Peroxy Acids and Their Esters

Preparation of Peroxy Acids

In Situ Epoxidation

The Epoxidation Mechanism

Unsaturated Materials

Epoxidation by Inorganic Peroxy Acids

Epoxidation with Aliphatic and Aromatic Hydrocarbon Hydroperoxides

Epoxidation with Chromic Acid and Chromyl Compounds

Biological Epoxidation

Dehydrohalogenation of Substituted Hydroxyl Compounds

The Epoxidation Mechanism

Halohydrin Formation

Epoxides from Epichlorohydrin

Glycidyl Ethers

Glycidyl Esters

Nitrogen-Containing Epoxides

Thioglycidyl Epoxides

Silicon-Containing Epoxides

Organophosphorus Epoxides

Halogen-Containing Epoxides

Epoxides from Hydroxy Sulfonates or Halogenated Acetates

Epoxides from Glycols

Epoxidation by Condensation

Darzens Glycidic Ester Condensations

Epoxides from Ylids

Epoxides from Halogenated Ketones and Nickel Carbonyl

Epoxides from the Reaction of Diazomethane with Aldehydes or Ketones

Epoxides Containing Unsaturation

Conclusions

## 2. Manufacture of Epoxy Resins

Raw Materials

Manufacture

Plant Location

Machinery Needed

Profit

## 3. Epoxide-Curing Reactions

The Effect of Epoxide Structure on Reactivity with Curing Agents

The Mechanism of the Curing Reaction

Polyaddition Reactions

Polyamines

Polyamides

Polyureas

Polyurethanes

Polyisocyanates

Polymercaptans

Polyhydric Alcohols

Polyphenols

Polycarboxylic Acids

Polybasic Acid Anhydrides

Silanes and Silanols

Others

Polymerization

Anionic Catalysts

Cationic Catalysts

4. The Dynamic Mechanical Properties of

Epoxy Resins

Basic Parameters

The Glassy Transition and Dynamic Mechanical Dispersion

Temperature and Frequency Interdependence

Experimental

Results and Discussion

Standard Measurements

Dynamic Measurements

Comparison of Results

Treatment by Reduced Variables

Conclusions

5. Physical and Chemical Properties of

Epoxy Resins

Solubility and Surface Properties

Network Structure and Physical Properties

Aging and Chemorheology

Bisphenol a Epoxy Homopolymers and Copolymers

Thermal Transition Effects

Dynamic Mechanical Response

Relaxation and Fracture Properties

Properties Compared with Elastomers and Thermoplastics

6. Epoxy Resin Adhesives

Introduction  
Theories of Adhesion and Adhesive-joint Strength  
Wetting and Spreading Phenomena  
Boundary-Layer Theory  
Surface-Attachment Theory of Adhesive-Joint Strengths  
Stress Distribution in Adhesive Joints  
Rheological Aspects of Adhesives  
Unified Interpretation of Adhesive-Joint Strengths  
Physical and Mechanical Aspects of Epoxy-Resin Adhesives  
Dynamic Mechanical Techniques  
Mechanical Behavior of Epoxy Adhesives During Joint Formation  
Strength of Adhesive Materials  
Chemical Aspects of Epoxy-based Adhesives  
Curing Agents for Bisphenol A Epoxy Adhesives  
Modifiers for Bisphenol A Epoxy Adhesives  
Adhesives Based on Other Epoxy Materials  
Technological Properties of Epoxy-adhesive Systems  
Cure and Thermal Softening Behavior of Epoxy Adhesives  
Stress and Environmental Durability of Adhesive Joints  
Applications of Epoxy Adhesives  
Future Prospects  
7. Epoxy Resin Coatings  
Classification of Epoxy-Resin Coatings  
Epoxy Resins Commonly Used in Coatings  
Epoxy-Resin Esters  
Esters Produced from Solid Epoxy Resins  
General Remarks  
Formulation Latitude  
Esters Produced from Liquid Epoxy Resins  
Precatalyzed Liquid Epoxy Resin for the Production of Solid Epoxy Resins and Epoxy-Resin Esters  
Cooking Procedure  
“Two-Step” Liquid-Epoxy-Resin Route to Epoxy-Resin Esters  
Cooking Procedure  
Solid-Epoxy-Resin Solution Coatings  
Cold-Cured Epoxy-Resin Systems  
Polyamine Curing Agents  
Polyamine-Adduct Curing Agents  
Polyamide-Resin Curing Agents  
Polyamide-Adduct Curing Agents  
Tertiary Amine Curing Agents

Industrial Maintenance Coatings Based on Cold-Cured Epoxy-Resin Systems  
High-Film-Build Cold-Cured Epoxy-Resin Coatings  
Application Instructions  
Manufacturing Instructions  
Epoxy Baking Finishes  
Epoxy-Phenolic Coating Systems  
Epoxy-Urea-Formaldehyde Resin Coating Systems  
Epoxy-Thermosetting Acrylic Coating Systems  
Liquid Epoxy Resins in Solventless and Super-High-Solids Systems  
Special Application Equipment and Formulation for Solventless Systems  
Manufacturing Instructions  
Application  
Ketimine Curing Agents  
Manufacturing Instructions  
Application  
Curing Characteristics  
Powder Coatings  
Application Equipment  
Epoxy-Resin Powder-Coating Formulations  
Fusion-Produced Epoxy-Resin Powders  
Manufacturing Instructions  
Applications Instructions  
Dry-blended Epoxy-Resin Powders  
Manufacturing Instructions  
Application Instructions  
Properties and Applications  
Thermoplastic Epoxy Resins  
Zinc-Rich and General Purpose Shop Primers  
Manufacturing Instructions  
Application Instructions  
Manufacturing Instructions  
Application Instructions  
Thermoplastic-Epoxy-Resin Crosslinked Systems  
Water-Reducible Epoxy Resin Coatings  
Water-Reducible Epoxy-Ester Baking Finishes  
Manufacturing Instructions  
Application Instructions  
Water-Reducible Polyamide-Cured Epoxy-Resin Coatings  
Manufacturing Instructions  
Manufacturing Instructions  
Water-Reducible Epoxy-Resin Coatings for Electrodeposition

General Remarks

Maleinization Step After Complete Esterification of the Epoxy Resin with Organic Acids

Cooking Procedure

Application Instructions

8. Epoxy Coating Give into Water

9. Electrical and Electronic Applications :

Sealants and Foams

Electronic and Electrical Applications

Introduction

Casting

Potting

Encapsulation

Coatings

Sealing

Molding

Formulation of the Resin System

Internal Stresses

Rapid Cures

Flexibilizing Epoxy Resins

Fillers

Reactive Diluents

Cycloaliphatic Epoxides

High-Temperature Epoxy-Resin Systems

Flame-Retardant Epoxy Resins

Colorless Epoxy Resins

Epoxy Formulations

Molding

Molding Compounds

Molding Technology

Liquid-Injection Molding

Pellets and Preforms

Epoxy Sealants

Epoxy Foams

Gas-Blown Foams

Syntactic Foams

One-Package Foams

Epoxy-Foam Applications

Epoxy Strippers

Handling of Epoxy Casting Systems

10. Analysis of Epoxides and Epoxy Resins

Uncured Epoxy Resins

## Qualitative Tests

### Detection of Free Epoxy Groups

#### Determination of Epoxy Group—Lithium-Chloride Test

##### Reagents

##### Procedure

#### Determination of Epoxy Group—Periodic Acid Test

##### Reagents

##### Procedure

#### Determination of Epoxy Group—Pyrolysis Test

## About Niir

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
