Handbook on Fruits, Vegetables & Food Processing with Canning & Preservation (3rd Edition)

Code	NI19
Format	paperback
Indian Price	₹1475
US Price	\$150
Pages	688
ISBN	9788178330839
Publisher	Asia Pacific Business Press Inc.

Description

Natural foods such as fruits and vegetables are among the most important foods of mankind as they are not only nutritive but are also indispensable for the maintenance of the health. India is the second largest producer of fruits and vegetables in the world. Fertile soils, a dry climate, clean water and abundant sunlight help the hard working farmers to produce a bountiful harvest. Although there are many similarities between fruits and vegetables, there is one important difference that affects the way that these two types of crop are processed like fruits are more acidic than vegetables. Food processing is the set of methods and techniques used to transform raw ingredients into food or to transform food into other forms for consumption. Food processing typically takes clean, harvested crops or butchered animal products and uses these to produce attractive, marketable and often long shelf-life food products. Canning is a method of preserving food in which the food is processed and sealed in an airtight container. Food preservation is the process of treating and handling food to stop or greatly slow down spoilage (loss of quality, edibility or nutritive value) caused or accelerated by micro organisms. One of the oldest methods of food preservation is by drying, which reduces water activity sufficiently to prevent or delay bacterial growth. Drying also reduces weight, making food more portable. Freezing is also one of the most commonly used processes commercially and domestically for preserving a very wide range of food including prepared food stuffs which would not have required freezing in their unprepared state. Fruits and vegetable processing in India is almost equally divided between the organized and unorganized sector, with the organized sector holding 48% of the share. The present book covers the processing techniques of various types of fruits, vegetables and other food products. This book also contains photographs of equipments and machineries used in fruits, vegetables and food processing along with canning and preservation. This book is an invaluable resource for new entrepreneurs, food technologists, industrialists etc.

Content

1. Characteristics of the Food Industry

Components of the Food Industry

Allied Industries

Interrelated Operations

2. Food Quality Assurance

The Need

A Role for Government

Microbiological Standards

A Role for Industry

Design of Company QA Program

Objectives

Raw Material Quality Assurance
In-process Quality Assurance
Finished Product Quality Assurance

3. Quality Factors in Foods

Appearance Factors

Color and Gloss

Consistency

Textural Factors

Measuring Texture

Texture Changes

Flavor Factors

Additional Quality Factors

Quality Standards

Planned Quality Control

4. Preserve, Candied and Crystallized Fruits and Vegetables

Preserve

General considerations

Candied Fruits/Vegetables

Process

Glazed Fruits/Vegetables

Crystallized Fruits/Vegetables

Problems in Preparation of Preserves and Candied Fruits

5. Food Preservation by Fermentation

Life with Microorganisms

Fermentation of Carbohydrates

Industrially Important Organisms in Food Preservation

Order of Fermentation

Types of Fermentations of Sugar

Fermentation Controls

Wine

Preservation

Sterilization Filtration

Beer

Vinegar Fermentation

Principles of Vinegar Fermentation

Vinegar Making

Preparation of Yeast Starter

Alcoholic Fermentation

Acetic Fermentation

Cheese

Kinds of Cheese

Cottage Cheese

Swiss Cheese

Blue Cheeses

6. Chemical Preservation of Foods

What Are Food Additives?

Importance of Chemical Additives

Legitimate Uses in Food Processing

Undesirable Uses of Additives

Safety of a Food Additives

Functional Chemical Additive Applications

Specific Uses of Chemical Additives

Additives Permitted and Prohibited in the United States

Chemical Preservatives

Microbial Antagonists

Sorbic Acid

Antibiotics

Quality Improving Agents

Other Chemical Additives

Artificial Flavoring

Artificial Coloring

7. Cold Preservation and Processing

Distinction Between Refrigeration and Freezing

Refrigeration and Cool Storage

Requirements of Refrigerated Storage

Controlled low Temperature

Air Circulation and Humidity

Modification of Gas Atmospheres

Changes in Food During Refrigerated Storage

Freezing and Frozen Storage

Initial Freezing Point

Freezing Curve

Changes During Freezing

Choice of Final Temperature

Food Composition

Noncompositional Influences

Freezing Methods

Air Freezing

Packaging Considerations
Some Additional Developments

8. Heat Preservation and Processing

Sterilization

Commercially Sterile

Pasteurization

Blanching

Selecting Heat Treatments

Heat Resistance of Microorganisms

Thermal Death Curves

Margin of Safety

Heat Transfer

Conduction and Convection Heating

Cold Point in Food Masses

Determining Process Time and Process Lethality

Protective Effects of Food Constituents

Different Temperature-Time Combinations

Heating Before or After Packaging

9. Food Pickling and Curing

Pickled Fruits and Vegetables

Use of Salt Stock

Sour Pickles, Sweet Pickles, Processed Dill Pickles

Sauerkraut

Olives

Fermented And Pickled Products

Deterioration

Nutritional Value

Bloater Damage Control

Controlled Fermentations in Commercial Brining Tanks

Brine Recovery

Defect Reduction

The Principles of Fish Salting

The Influence of the Composition of Salt

Commercial Methods of Salting Fish

Brine-salting

Dry-salting

Comparative Efficiency of Brine-salting and Dry-salting

Some-curing Processes

Cold-smoking (Heavy Salt Cure)

Smoked Salmon
Hard-smoked Salmon
Meat Curing and Smoking
Pickled Meats
Salt
Sugar and Corn Syrup Solids
Nitrite and/or Nitrate
Nitrosamines
Phosphates
Sodium Erythorbate
Cured Meat Color
Role of Nitrite and/or Nitrate in Meat Color
Sausages and Table-ready Meats
Dry Sausage Manufacture
Processing
Fermentation

10. Food Preservation by Drying
Drying-A Natural Process
Dehydration-Artificial Drying
Dehydration vs. Sun Drying
Why Dried Foods?
Dehydration Permits Food Preservation
Humidity-Water Vapor Content of Air
RH-The drying Medium
Types of Driers
Adiabatic Driers
Heat Transfer through a Solid Surface
Criteria of Success in Dehydrated Foods
Freeze-Dehydration (Freeze Drying)
Triple Point of Water
Temperature Changes in Meat Freeze-dehydration
Influence of Dehydration on Nutritive Value of Food
Dehydration of Fruits
Dehydration of Vegetables
Dehydration of Animal Products
Dehydration of Fish
Dehydration of Milk
Dehydration of Eggs
Packaging of Dehydrated Foods

11. Food Preservation by Canning 1

Temperature vs. Pressure

Heat Resistance of Microorganisms Important in Canning

Factors Influencing the Heat Resistance of Spores

Heat Resistance of Enzymes in Food

Heat Penetration into Food Containers and Content

Storage of Canned Foods

External Corrosion of Cans

Coding the Pack

Influence of Canning on the Quality of Food

Color

Flavour and Texture

Protein

Improvements in Canning Technology

Retort Pouches

Testing a Good Seal

Hazard Analysis

12. Pickles

Preservation with Salt

Preservation with Vinegar

Preservation with Oil

Preservation with Mixture of Salt, Oil, Spices and Vinegar

Problems in pickle making

13. Chutneys and Sauces/Ketchups

Chutneys

Recipes for chutneys

Sweet mango chutney

Apple chutney

Plum chutney

Wood apple chutney

Apricot chutney

Papaya chutney

Tomato chutney

Aonla chutney

Sauces (Ketchups)

Recipes for sauces (ketchups)

Tomato sauce

Apple sauce

Plum sauce

Papaya sauce
Mushroom sauce
Aonla sauce
Problem in the preparation of sauces/ketchups

14. Mushroom Processing

Dehydration
Preparation of ketchup
Preservation with salt and acetic acid
Pickling
Canning
Mushroom poisoning

15. Tomato Processing

16. Jam, Jelly and Marmalade

Jam
Problems in jam production
Jelly
Important considerations in jelly making
Pectin
Acid
Sugar
Judging of end-point
Marmalade
After pectin extraction

17. Freezing of Fruits and Vegetables

Preparation of fruits/vegetables for freezing
Methods of freezing
Sharp freezing (Slow freezing)
Quick freezing
By direct immersion
Advantages
Disadvantages
By indirect contact with refrigerant
By air blast
Cryogenic freezing
Dhydro-freezing
Freeze-drying
Changes during freezing and storage for frozen products

Freezing process for fruits and vegetables

18. Vinegar

Types of vinegar

Steps involved in vinegar production

Outline Scheme of Vinegar Production

Preparation of vinegar

Slow process

Orleans slow process

Quick process (Generator or German process)

Precautions

Problems in vinegar production

19. Drying and Dehydration of Fruits and Vegetables

Advantages of dehydration over sun-drying

Spoilage of dried products

Reconstitution test for dried/dehydrated products

Reconstitution test

20. The Canning Process

Cans

Types of Cans

Square and Pullman Base

Pear Shaped

Round Sanitary

Drawn Aluminum

Oblong

Can Materials

Retorts

Nonagitating Retorts

Continuous Agitating Retorts

Hydrostatic Retorts

Establishment of Retort Schedule

Pasteurized Canned Products

Closing

Pasteurizing Cook

Cooling

Storage and Shelf Life

Aseptic Canning

21. Food Freezing

Development of a Frozen Food Industry
The Freezing Point of Foods
Percentage Water Frozen vs. Temperature of Food and Its Quality
Size of Ice Crystals Formed
Volume Changes During Freezing
Refrigeration Requirements in Freezing Foods
Freezing in Air
Freezing by Indirect Contact with Refrigerants
Direct Immersion Freezing
Packaging Requirements for Frozen Foods
Influence of Freezing on Microorganisms
Influence of Freezing on Proteins
Influence of Freezing on Enzymes
Influence of Freezing on Fats
Influence of Freezing on Vitamins
Freezing of Bakery Products
Packaging
Storage Life of Frozen Bread
Cookies and Cakes
Frozen Dairy Foods
The Ice Cream Industry
Basic Ingredients
Manufacture of Ice Cream
The Mix
Pasteurization
Homogenization
Cooling
Freezing
Hardening
Hazard Analysis
Hazard Categories

22. Cookie and Cracker Production Technology

Ingredients Handling
Mixing
Dough Relaxation and Fermentation
Dough Machining and Forming
Dough Relaxing
Cutting Stage
Scrap Return

- Salter or Sugar Sprinkling
- Rotary Molding
- Extruder-Dough Formers
- Wire Cut
- Rout Press
- The Fruit Bar Coextruder
- Baking
 - Direct-Fired Ovens, Gas Fired
 - Convection (Indirect) Ovens
- Post Conditioning
- Secondary Processes
- Icings
- Enrobing
- Sandwiched Cookies and Crackers
- Biscuit Packaging

23. Snack Foods

- Introduction
- Popcorn
 - Four Types of Popcorn
 - Mechanism of Popping
 - Quality factors
- Processing
- Formulated Puffed Snacks
- Ingredients
- Other Grain Products
- Expandable Ingredients
- Frying Fats
- Antioxidants
- Sweeteners
- Other Ingredients
- Extruders and Extruding
 - Types of Extruders
- Snacks that Are Cooked and Formed
- Drying

24. Breakfast Cereals

- Introduction
- Present Status
- Processing of Hot-serve Cereals
- Wheat Cereals

Corn Cereals
Oat Cereals
Processing Ready-to-Eat Breakfast Cereals
Flakes
General Considerations
Corn Flakes
Wheat flakes
Bran Flakes
Shreds
Shredded Wheat Biscuits
Puffed Cereals
General Considerations
Oven-puffed Rice
Puffing by Extrusion
Sugar-coated Products
Ovens

25. Canned Meat Formulations
Corned Beef Hash
Federal Meat Inspection Regulations
Preparation
Meat
Potatoes
Onions
Canning
Beef Stew
Federal Meat Inspection Regulations
Preparation
Meat
Potatoes
Carrots
Onions
Preparation
Canning

28. Processing of Rice

Introduction

Quality of Rice

Milling of Rice

- Small-scale Milling
- Modern Conventional Milling
- Abrasive Milling of Rice
- Lye-peeling
- Extractive Milling
- Rice Flour
- Further Processing of Rice
- Boiling and Steaming
- Parboiling
- Quick-cooking Rice
- Shelf-stable Cooked Rice
- Rice Cakes
- Rice Milk

29. Creaming, Emulsions, and Emulsifiers

- Emulsifier and Emulsions
- Classification
- Hydrophilic-Lipophilic Balance (HLB)
- Oil-in-Water Emulsions
- Type of Emulsifier used in Cookies and Crackers
- Phosphatides and Lecithin
- Synthetic Emulsifiers
- Function of Emulsifiers in Cookies and Crackers
- Eggs
- Emulsifier
- Mixing Operation in Cookie and Cracker Doughs
- Mixing Operation
- Creaming Method
- Two-stage Method
- Three-stage Method
- Baking Cookies and Crackers
- Emulsion Stability
- Viscosity
- To Lower Viscosity
- To Increase Viscosity
- Elevated Temperature
- Inversion Phase
- Phase Equilibria
- Batter Aeration

30. Principles of Food Packaging

Introduction
Functions of Food Packaging
Requirements For Effective Food Packaging
Types of Containers
Primary, Secondary, and Tertiary
Form-Fill-Seal Packaging
Hermetic Closure
Food-Packaging Materials and Forms
Metal
Metal Cans
Can Construction
Can Corrosion
Can Sizing
Glass
Glass Containers
Paper, Paperboard, and Fiberboard
Plastics
Laminates
Retortable Pouches and Trays
Edible Films
Wood and Cloth Materials
Package Testing
High Barrier Plastic Bottles
Aseptic Packaging in Composite Cartons
Military Food Packaging

About Niir

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies,

Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
