Cultivation and Utilization of Aromatic Plants

Code	NI155
Format	paperback
Indian Price	₹1100
US Price	\$125
Pages	608
ISBN	817833027X
Publisher	Asia Pacific Business Press Inc.

Description

Aroma has played a vital role, directly as well as indirectly, in the life of human beings since its appearance on the earth as a result of evolution. India, Egypt and Persia were

amongst the first countries to have conceived the process of distillation of essential oils. Aromatic plants have essential or aromatic oils naturally occurring in them. They help heal mental ailments and other diseases. India is endowed with a rich wealth of medicinal plants. Aromatic (Aroma Producing) plants are those plants which produce a certain type of aroma. Their aroma is due to the presence of some kind of essential oil with chemical constituents that contain at least one benzene ring in their chemical configuration. These plants have made a good contribution to the development of ancient Indian material medica. In recent years, there has been a tremendous growth of interest in plant based drugs, pharmaceuticals, perfumery products, cosmetics and aroma compounds used in food flavors and fragrances and natural colors in the world. The chemical nature of these aromatic substances may be due to a variety of complex chemical compounds. There is a definite trend to adopt plant based products due to the cumulative derogatory effects resulting from the use of antibiotic and synthetics and except for a few cultivated crops, the availability of plant based material is mainly from the natural sources like forests and wastelands. There is a need to introduce these crops into the cropping system of the country, which, besides meeting the demands of the industry, will also help to maintain the standards on quality, potency and chemical composition. During the past decade, demand for aromatic plants and its products has attracted the worldwide interest, India being the treasure house of biodiversity, accounts for thousands of species which are used in herbal drugs. 90% of herbal industry requirement of raw material is taken out from the forests.

This book basically deals with cultivation of *matricaria chamomilla*, present agro production technology status of celery, cultivation of *ocimum gratissimum* linn. var *clocimum*, the production and perfume potential of *jasminum* collections, chemical modification of turmeric oil to more value added products, biologically active compounds from turpentine oil, folk medicinal uses of indigenous aromatic plants in nepal, traditional uses of selected aromatic plants of bhutan and their cultivation prospects, blending aspects of perfumes with turpentine constituents, the chemistry of mint flavour, essential oils of *cinnaomum* species, citral containing *cymbopogon* species etc..

The aim of publishing this book is to provide multidisciplinary information on aromatic plants. The book covers method of cultivation and utilization of various aromatic plants. This is very useful book for farmers, technocrats, agriculture universities, libraries, new entrepreneurs etc.

Content

1. Cultivation of *Matricaria Chamomilla*
2. Damask Rose (*Rosa Damascena* Mill.) Cultivation and Processing

3. Present Agro production Technology Status of Celery (*Apium graveolens* L.)
4. Germination and Flowering of *Ocimum selloii* Benth
5. RRL Oc 12 A Newly Evolved Methyl Cinnamate Rich Strain of *Ocimum canum* Sims.
6. Search for New Aroma Chemicals from genus *Ocimum*
7. Cultivation of *Ocimum gratissimum* Linn. var *Clocimum*
8. Cultivation of Anise
9. Patchouli
10. Removal of Calamus Odour from Patchouli Oil
11. Propagation of Patchouli (*Pogostemon Cablin* Benth.)
12. Patchouli Root Knot Problem and Control
13. *Alponia Galanga*
14. *Citrus Medica* Linn.
15. *Curcuma Longa*
16. *Cuminum Cyminum*, Linn.
17. *Cyperus Rotundus*
18. *Hibiscus Rosa Sinensis*, Linn.
19. *Piper Nigrum*
20. Pomegranate
21. *Ricinus Communis* Linn.
22. Common Elder
23. Tamarind Tree
24. *Woodfordia Fruticosa*, Vurz.
25. *Angelica* (*Angelica Archangelica*)
26. Sandalwood Oil Substitutes A Review
27. Native Jasmines of India
28. Screening of Flowers of *Jasminum* Species for Indole
29. Production Economics of Jasmine Concrete
30. The Production and Perfume Potential of *Jasminum* Collections
31. New Compounds of Value in Perfumery and Flavour Industry from *Carene*
32. Citral Containing *Cymbopogon* Species
33. *Cedrus* Oil A Promising Antifungal Agent
34. Terpenes and Coumarins from the Seeds of *Peucedanum Dhana* Ham. Seeds
35. Essential Oils of *Cinnamomum* Species
36. *Jamrosa* a New Geraniol Rich *Cymbopogon*
37. 9 Aristolen 1 alpha ol and l(10) Aristolen 2 one from *Nardostachys Jatamansi* DC
38. Comparison of Chemical Composition of Pepper and Pepper Leaf Oil
39. Chemical Modification of Turmeric Oil to More Value Added Products
40. Rectification of Benzene Extract A Simple Method for Extracting Sandal Oil in Higher Yield
41. *Palmarosa* Oil Grass for Higher Yield of Oil and Its Quality Under Cultivation
42. Effect of Harvest Management on the Yield of Essential Oil Content and Flavour of

- Kala Zira (*Carum bulbocastanum* W. Koch) Seed.
43. Essential Oil from *Cymbopogon Olivieri* (Boiss. C. B.) Bor.
 44. Chromatographic Separation of Alpha and Beta Santalenes
 45. The Rose Fragrance
 46. Breeding of a New Type of *Ocimum Gratissimum* for Eugenol Rich Essential Oil
 47. Breeding for High Essential Oil Content in Khas (*Vetiveria zizanioides*) Roots
 48. *Ocimum Sanctum* for High Oil and Eugenol Content
 49. Essential Oil of *Artemisia pallens* Wall (Davana)
 50. Essential Oil from the Seeds of *Anethum graveolens* Linn. raised at Lucknow
 51. Terpenoids from *Palmarosa* Grass (*Cymbopogon martini* var. *motia*)
 52. Effect of Fertilizer Treatments on Yield and Economics of Cultivation of *Mentha*, *Citronella* and *Palmarosa*
 53. Oil Content and Its Composition at Different Stages of Growth in *Ocimum Sanctum* Linn.
 54. Weed Control in the First and Second Cutting of Japanese Mint (*Mentha Arvensis* L.)
 55. The Chemistry of Mint Flavour
 56. Ozonolysis Studies on Phenolic Constituents from *Clocimum* Oil
 57. Natural Isolates & Reconstituted Essential Oils
 58. Some Aspects of Longifolene Chemistry
 59. Alpha Pinene Derivatives
 60. Biologically Active Compounds from Turpentine Oil
 61. Pesticides From Turpentine Oil
 62. Blending Aspects of Perfumes with Turpentine Constituents
 63. Insecticides Based on Turpentine
 64. Promising Aromatic Plants of Industrial Value from North east India
 65. Traditional Aromatic Incense and Insect Repellent Plants of Uttar Pradesh Himalaya
 66. The Status of Essential Oil Bearing Plants in Uttaranchal (U.P.) India
 67. Folk Medicinal Uses of Indigenous Aromatic Plants in Nepal
 68. Traditional Uses of Selected Aromatic Plants of Bhutan and their Cultivation Prospects

About Niir

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of

Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
