

Recovery of Ferric oxide (Fe₂O₃) & Titanium Dioxide (TiO₂) from Bauxite Processing Waste

Description:

Recovery of Ferric oxide (Fe₂O₃) & Titanium Dioxide (TiO₂) from Bauxite Processing Waste. Wealth from Waste

Ferric oxide (Fe₂O₃) is an inorganic compound also known as hematite. Ferric oxide is used in the iron industry in the manufacturing of alloys and steel. The Food and Drug Administration (FDA) has approved ferric oxide pigment for use in cosmetics. Moreover, ferric oxide granules are used in the form of filtration media for removing phosphates in saltwater aquariums.
