

Manufacturing of Vermicompost and Organic Manure

Description:

Manufacturing of Vermicompost and Organic Manure. Profitable Investment in Organic Natural Plant Nutrient Industry.

Vermicompost

Vermicompost is the product of the decomposition process using various species of worms, usually red wigglers, white worms, and other earthworms, to create a mixture of decomposing vegetable or food waste, bedding materials, and vermicast. Vermicast is the end-product of the breakdown of organic matter by earthworms. Vermicomposting is a type of composting in which certain species of earthworms are used to enhance the process of organic waste conversion and produce a better end-product.
