

Manufacturing of Biomass Briquettes from Biowaste.

Description:

Manufacturing of Biomass Briquettes from Biowaste. Profitable Investment in Agro Waste Briquette Industry. Turning Waste into Energy

[Biomass](#) briquettes are a biofuel substitute to coal and charcoal. Briquettes are mostly used in the developing world, where cooking fuels are not as easily available. There has been a move to the use of briquettes in the developed world, where they are used to heat industrial boilers in order to produce electricity from steam. The briquettes are co-fired with coal in order to create the heat supplied to the boiler.
