

Manufacturing of L-ASCORBIC ACID (PLAIN).

Description:

Manufacturing of L-ASCORBIC ACID (PLAIN). Profit-Making Business for Entrepreneurs, Startups.

L-[Ascorbic acid](#) is an organic acid with antioxidant properties. Its appearance is white to light yellow crystals or powder. It's [water](#)-soluble. The L-enantiomer of ascorbic acid is usually referred to as [vitamin C](#). The name is derived from the alpha privative a- (meaning no) and scorbutic United States (scurvy), the disease caused by a deficiency of vitamin c. In 1937 the Nobel Prize for chemistry was awarded to Walter Haworth for his add determining the structure of L-ascorbic acid (shared with Paul Karrer, who received his award for work on vitamins), and also the prize for Physiology or medicine that year went to Albert Szent-Gyorgyi for his studies of the biological functions of L-ascorbic acid.
