

Manufacturing of Methyl Ethyl Ketone (MEK).

Description:

Manufacturing of Methyl Ethyl Ketone (MEK). Startup Business Investment in Butanone Industry.

Butanone, conjointly known as [methyl ethyl ketone \(MEK\)](#) is a chemical compound with the formula $\text{CH}_3\text{C}(\text{O})\text{CH}_2\text{CH}_3$. This colorless liquid ketone has a sharp, sweet odor similar to butterscotch and acetone. It is made industrially on a large scale, but occurs in nature solely in trace amounts. It is partly soluble in water, and is commonly used as an industrial solvent. It is a compound of another solvent, tetrahydrofuran.

Projects-[Project Reports & Profiles](#)

Butanone is a manufactured [chemical](#) however it is also present within the environment from natural sources. It is a colorless liquid with a pointy, sweet odor. It is conjointly known as methyl ethyl ketone (MEK). Ketone is produced in giant quantities. Nearly half of its use is in paints and different coatings because it will quickly evaporate into the air and it dissolves several substances. It is conjointly utilized in glues and as a cleaning agent. Butanone occurs as a natural product. It is created by some trees and found in some [fruits and vegetables](#) in small amounts. It is also free to the air from car and truck exhausts.
