

Phenolic Formaldehyde Resin (PF)

Description:

Phenolic Formaldehyde Resin (PF) (Manufacturing Industry, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities), Cost and Revenue, Plant Economics, Production Schedule, Working Capital Requirement, Plant Layout, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis)

Synthetic polymers made from the reaction of phenol or substituted phenol with formaldehyde are known as phenol formaldehyde resins (PF) or phenolic resins. PFs were the first commercial synthetic resins, and they were used to make Bakelite (plastics). They've been used to make moulded goods like billiard balls and laboratory countertops, as well as coatings and adhesives.
