

Start Production Business of Paracetamol (Acetaminophen) API. Rising Demand of Paracetamol Tablets in Covid-19 Pandemic.

Description:

Start Production Business of Paracetamol (Acetaminophen) API. Rising Demand of Paracetamol Tablets in Covid-19 Pandemic.

Paracetamol, often known as acetaminophen, is a pain reliever that is used to treat mild to moderate pain and fever. Paracetamol only marginally lowers body temperature at a typical dose; it is inferior to ibuprofen in this regard, and the benefits of its use for fever are uncertain. In acute migraine, paracetamol greatly reduces pain, but only marginally in episodic tension headache.
