

# **Xanthan Gum (Food and Oil Drilling Grade) Production Business. Profitable Business for New Startup**

**Description:**

## **Xanthan Gum (Food and Oil Drilling Grade) Production Business. Profitable Business for New Startup**

The foodthickening xanthan gum is generated from bacteria that infect a variety of plants. It can be found in a range of meals as well as items like toothpaste. Though it may have some health benefits, it is primarily employed to alter the texture of food rather than for any specific health purpose. A bacterial fermentation process produces xanthan gum.
