

Production of Enamel Paints with Formulation (Exterior Paints, Interior Paints, Metal Paints, Speciality Paints, Masonry Paints, Industrial Paints, Enamels, Varnishes, Lacquers and Wood Finishes, Primers, Interior Semi gloss Enamels)

Description:

Enamel paint is a term that is used to reference a paint with a hard, glossy and opaque finish. In actuality, the term “enamel paint” does not necessarily have a generally accepted or standardized definition, but historically, enamel paint has been used to refer to any type of enamel paint that is oil based and with a considerably glossy finish.

Enamels are available in a wide spectrum of colors and a number of sheens, including eggshell, low luster, satin, flat finish, gloss, semi-gloss and high gloss, among others. Specialty enamels, used for specialty type projects such as painting appliances, are also offered and frequently have the benefits of quicker drying times. Enamels are used on various substrates like wood, metal furniture, train coaches, automobiles industries etc. Enamel paints are commonly used around the house in areas such as trims, doors, in the bathroom, kitchen, for different types of flooring, stairs, basements, porches and patios, as these rooms and surfaces endure a high degree of abuse and variations in temperature. Enamel paints may be used on various surfaces around the house, including wood, metal, wicker, concrete, masonry, wrought iron, glass, plaster and ceramic, among others.
