

# Sesame Oil Manufacturing Business

## Description:

### **Sesame Oil Manufacturing Business. Extraction of Sesame Seed Oil. Emerging Investment Opportunities in Edible Oil Industry**

Sesame oil is a vegetable oil, with the colour ranging from a pale yellow to amber colored oil derived from the seeds of sesame plant. Sesame oil is produced using cold-press methods or normal oil-refining methods. The major application of this oil is found in cooking, the oil is also used in salad dressings, cosmetics and in other health and wellness products. Although the use of this oil in the other industries such as cosmetics has not been significantly high but the consumption of sesame oil for its nutrient has picked up as the trends in healthy living rises.

Sesame oil is also use in certain cosmetic products as well, many hair care and skin care products such as hair serums, hair oil, lotions and conditioners use sesame oil as an active ingredient. It is often severed in the premium cosmetics category where the demand for this product is increasing at much higher levels. This demand is further expected to increase backed by the rise to a nutricosmetics segment in cosmetics industry.
