

# Production of Bamboo Toothbrush

## Description:

Production of Bamboo Toothbrush. Eco-Friendly Toothbrushes. Small Manufacturing Business Ideas.

Plant-based bamboo toothbrush with all components made from plant: bristles, handle, wrapper and box. Compostable packaging. Brush with Bamboo makes the world's most eco-friendly toothbrushes made with the highest quality standards. Each bamboo toothbrush replaces a non-biodegradable plastic toothbrush. The toothbrush is an oral hygiene instrument used to clean the teeth, gums, and tongue. It consists of a head of tightly clustered bristle, atop of which toothpaste can be applied, mounted on a handle which facilitates the cleaning of hard to reach areas of the mouth. They are usually used alongside floss. They are available with different bristle textures, sizes, and forms. Most dentists recommend using a soft toothbrush since hard-bristled toothbrushes can damage tooth enamel and irritate the gums
