

Start Camphor Manufacturing Business

Description:

Start Camphor Manufacturing Business. Profitable camphor and camphor Powder & Tablets industry

Camphor (Cinnamomum camphora) is a terpene (organic compound) that's commonly used in creams, ointments, and lotions. Camphor oil is the oil extracted from the wood of camphor trees and processed by steam distillation. It can be used topically to relieve pain, irritation, and itching

Camphor is a powder that originally came from the bark and wood of the camphor tree. Today, most camphor is synthetic. It's in some products that are applied to the skin, including FDA-approved treatments. It's a common ingredient in remedies applied to the skin for cough and skin irritation.
