

Profitable Business Ideas in Manufacturing of Chlorinated Paraffin Wax (CPW) Industry

Description:

Profitable Business Ideas in Manufacturing of Chlorinated Paraffin Wax (CPW) Industry. Opportunities in Chlorinated Paraffin's Project.

Chlorinated Heavy Normal paraffin is a replacement of chlorinated paraffin wax. The method of manufacturing of both the products is the same and so is the end-use. Apart from above the best part of Chlorinated Heavy Normal Paraffin is that in this product maximum Chlorination which can be achieved is 70% while in chlorinated paraffin wax it is 60%. It is used as secondary plasticizer for Polyvinyl Chloride resins, plasticizer extender in synthetic rubber, Nitrocellulose, polystyrene etc. It is also used for impregnating textile and fabrics of all kinds as a flame retardant. It also finds application in paint industry for manufacturing of fire proof paints. It is widely used in foundry industry.
