

Green Business Ideas for Startup, Entrepreneurs

Description:

Green Business Ideas for Startup, Entrepreneurs. Profitable Manufacturing of Biodegradable Products. Earth Friendly Products Production.

The non-biodegradable plastic products, which are commonly used in households, cannot be recycled for 400 years. Products like plastic carry bags, if disposed unscientifically, are hard to decompose and are a massive threat to soil cultivation.

Biodegradable substances are those that degrades or break down naturally. Materials like plants, animals, their waste, paper, fruits, flowers, vegetables fall under biodegradable substances, on the other hand, rubber, plastic, chemicals, paint plastic falls under the category of the non-biodegradable items.
