

Geotextiles (for Road Construction) Manufacturing Plant.

Description:

Geotextiles (for Road Construction) Manufacturing Plant. Production of Geotextiles. Opportunities in Technical Textiles Sector

A geotextile is any permeable textile material used with foundation, soil, rock, earth, etc. that is an integral part of a constructed, structure or system.

Geotextiles were used in roadway construction in the days of the Pharaohs to stabilize roadways and their edges. These early geotextiles were made of natural fibers, fabrics or vegetation mixed with soil to improve road quality, particularly when roads were made on unstable soil.
