

Manufacturing of ABC (Aerial Bundled Cable) Conductors.

Description:

Manufacturing of ABC (Aerial Bundled Cable) Conductors. Investment Opportunities in Overhead Power Distribution Sector.

[Aerial bundled conductors](#) or simply ABC are overhead power lines using several insulated phase conductors bundled tightly together, usually with a bare neutral conductor. Aerial Bundled Cable (ABC) is an innovative concept for Over Head (OH) power distribution. This variation of overhead power lines utilizes the same principles as bundled conductors, except that they are closer together to the point of touching but each conductor is surrounded by an insulating layer (except for the neutral line).
