Description:

Disposable products have an urban as well as rural market. These products are mostly used during social functions, religious gatherings, parties, marriages, outings, in sweet shops, by caterers etc. The products have many advantages and are hence preferred as compared to standard utensils/crockery for serving eatables. They can easily be disposed off after use and hence save a lot of labour as far as cleaning/drying of utensils are concerned. These are easily transportable and easy to handle. In our country people are religious and organise functions throughout the year all such occasions call for social gathering and celebrations with meals, snacks sweets being served. Further, our vast population organises marriages, celebrates birthdays and other family functions on a regular basis. Sweet shops and small eateries can be found at every street corner and all such joints use these disposable plates and bowls.

Due to the recent change in the life style of urban class the demand for disposable cups is increasing at a rapid rate.

Disposable plates, bowls, drinks cups and other forms of food containers help to give us the option of eating away from home without disturbing the nutritional value of eatables. In addition to social occasions, such as picnics or barbecues, many people eat away from home at school, work or in other environments. Disposable food containers are also a great convenience when holding a party or catering for a large number of people. World's major food and beverage industries prefer the disposable packaging to avoid washing trouble.
