

Stainless Steel Tubes & Pipes, SS Pipe and Tubes, Tube mill, Pipe Mill, Extrusion and Pilgering Process, Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw

Description:

Stainless steel pipes & tubes are used in petrochemicals, fertilizers, dairy industries power stations and nuclear plants. Other corrosion resistant applications as of food processing industry are also significant users. These pipes are used extensively by Nuclear Fuel Corporation.), steel tubes industry was poised for a 30% growth in the wake of a growing demand in the infrastructure construction sector, mainly in scaffolding in buildings. The sector has grown dramatically in the recent past at a record 20% growth owing to several infrastructure projects lined up by the government and the private sector.

The steel tubes and pipes industry witnessed demand from various domestic industries like real estate, construction, telecom, power, energy, entertainment zones, metros, airports and ports, etc. Key policy-led initiatives such as the urban infrastructure programme under Public Private Partnership also proved to be a shot in the arm.

The market environment for stainless steel tube & pipe is challenging at the moment. Whilst the outlook for the automotive industry and building & construction remains mostly positive, significant cutbacks can be expected for tube & pipe for industrial applications as a result of very low project activity, especially in the oil & gas industry.

The demand of stainless steel pipes & tubes is majorly driven by the growing and expanding oil and gas industry, exploration and production of oil and gases and exponentially growing automobile industry in growing economies. The market is anticipated to grow at the back rising demand and unmet opportunities in the developing nations of the world.
