

# Business Opportunity in Production of Biodegradable Plastic Bags from Corn and Cassava Starch Granules.

**Description:**

## **BiodegradablePlastic Packaging.**

[Biodegradableplastic](#) is [plastic](#)that decomposes naturally within the environment. This is often achieved oncemicroorganisms within the environment metabolize and break down the structureof [biodegradableplastic](#). The tip result is one that is less harmful tothe environment than traditional [plastics](#).

[Biodegradableplastics](#) will be composed of bio-plastics that are [plastics](#)made of renewable raw materials. There are usually two types of [biodegradableplastic](#),injection molded and solid. The solid forms normally are used for items similarto [food](#)containers, leaf collection bags, and water bottles.
