

Emerging Investment Opportunities in Production of Herbal Ayurvedic Hand Sanitizer

Description:

Emerging Investment Opportunities in Production of Herbal Ayurvedic Hand Sanitizer. Start Your Own Disinfectant Industry.

[Herbal hand sanitizer](#) was prepared using leaves extracts of osmium sanctum, Eugenia caryophyllus and Cymbopogon flexuosus. The antibiotic sensitivity test of the prepared [herbal](#) hand sanitizer against skin pathogens was checked using disc diffusion methodology and results were compared with commercially available [synthetic](#) hand sanitizer. The herbal hand sanitizer gives larger inhibition zone than the commercially available synthetic [hand sanitizer](#) against staphylococcus aureus and pseudomonas aeruginosa. The efficacy of herbal hand sanitizer was evaluated using microorganism suspensions; that disclosed that the herbal hand sanitizer is efficient in reducing higher number of microorganism from the hands as compared to commercial [synthetic](#) hand sanitizer. Thus, because of higher antimicrobial activity and efficacy these herbal extracts are utilized in the preparation of herbal hand sanitizer on business scale.
