

Automatic Bread and Biscuit Plant, Bakery Products, Flour-based food products, Biscuits Baking Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials,

Description:

Bread is most consumable wheat based bakery product. It contains high nutritive value. This is easy to digest therefore, its consumption is increasing very fast. Biscuits appear to have been first manufactured in India more than three centuries ago. With the development of biscuits came the development of several other products. Indian bakery industry is spreaded overall small scale, large scale and household sectors. Bread is manufactured through fermentation and baking process. The manufacturing process and techniques are so simple that they can easily be adopted for production at any level. Bakery products in India are now in common use. Biscuit is a solid product. It is crispy in taste. It is estimated to enjoy around 37% share by volume and 75% by value of the bakery industry. There is a good scope for new entrepreneurs to venture into this field.

The two major bakery products, biscuits and bread, account for 82% of all bakery production. The unorganized sector accounts for about half of the total biscuit production. It accounts for 85% of the total bread production and around 90% of the other bakery products (pastries, cakes, buns, rusks) estimated at 750,000 tonne.
