

Production of Disposable Nitrile Gloves.

Description:

Production of Disposable Nitrile Gloves. Most Demanding Profitable Business Ideas.

[Nitrile](#) may be a synthetic rubber compound that's usually used as a disposable glove material. Nitrile has been around for a while, however only recently it's become more affordable, that explains why it's gaining popularity throughout medical, food and cleaning industries. Nitrile includes a higher puncture resistance than any other glove material. [Nitrile](#) also has a better chemical resistance than [Latex](#) or Vinyl gloves.
