

# Manufacturing of A4 and A3 Size Paper.

## Description:

[Manufacturing of A4 and A3 Size Paper. Profitable Business Ideas in Copier Paper, Photo Copy Paper Industry.](#)

[Paper](#) size standards govern the size of sheets of paper used as writing paper, [stationery](#), cards, and for a few printed documents.

Far and away the most common paper size used today is A4. At 210 x 297mm the A4 page is the industry standard for office document sizes.

A4 [paper](#) comes in a range of paperweights ranging from 75gsm<sup>2</sup> to 300gsm<sup>2</sup> with a variety of types including index [paper](#), cover paper and text paper each with their own unique properties including thickness, strength and feel.

As well as printing in A4 formats, the majority of modern printers can also print on media of smaller sizes including A5 & A6. For the majority of day to day printing tasks an A4 sized printer should be sufficient.
