

Manufacturing of Ascorbic Acid.

Description:

Manufacturing of Ascorbic Acid. Opportunities for Entrepreneurs to Start Own Business in Vitamin C Industry.

[Ascorbic Acid](#) could be a natural water-soluble vitamin (Vitamin C). Ascorbic acid could be a potent reducing and antioxidant agent that functions in fighting bacterial infections, detoxifying reactions, and within the formation of scleroprotein in fibrous tissue, teeth, bones, connective tissue, skin, and capillaries. Found in citrus and other fruits, and in vegetables, [vitamin C](#) cannot be produced or stored by humans and should be obtained within the diet.

Project Reports:- [Project Reports & Profiles](#)

[Ascorbic Acid \(vitamin C\)](#) Injection is a sterile solution. Every ml contains: ascorbic acid (vitamin C) 250 mg and Edetate Disodium 0.025% in Water for Injection sq. Prepared with the help of [Sodium bicarbonate](#). Sodium hydroxide and/or hydrochloric acid could be used to adjust pH.
