

Increasing Demand of Potato Vodka is Creating Opportunities for Entrepreneurs Vodka from Potato, Distilled Beverage, Alcoholic Beverages Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufa

Description:

India is the 3rd largest liquor market in the world and one of the fastest growing markets in the world, on the back of demographics & economy. India presents a huge growth potential for alcoholic beverages sales. The government is planning to do away with the license requirement for manufacturing potable alcohol. Vodka is one of the world's most consumed distilled beverages. It is typically a colorless liquid containing ethanol purified by distillation from a fermented substance such as grain.

Vodka is usually not aged and can be made from grains, potatoes, sugars, fruits, and just about anything else that can be fermented to produce alcohol. This makes vodka an economical spirit that can be made easily in a short amount of time from readily available materials.

Vodka is a very distinct tasting alcohol and one of the best liquors. Vodka is an alcoholic beverage that comprises water and ethanol and contains 35%-40% alcohol by volume. It is distilled from a variety of ingredients, including fermented grains and potatoes, fruits, and molasses, among others. As vodka became popular among the younger age profile and more ladies switched to vodka and cocktails.
