Description:

Maize Processing Business Plan- Maize and it's By Products (Maize Starch, Sorbitol, Liquid Glucose, Dextrose Monohydrate, Dextrose Anhydrous, Gluten and Maltodextrin). Profitable Business Opportunity.

Maize may be a cereal grain first domesticated by indigenous peoples in southern Mexico about 10,000 years ago. The leafy stalk of the plant produces pollen inflorescences and separate ovuliferous inflorescences called ears that yield kernels or seeds, which are fruits. Maize is widely cultivated throughout the globe, and a greater weight of maize is produced every year than the other grain.

Corn, also called Indian corn or maize, cereal plant of the grass family (Poaceae) and its edible grain. The domesticated crop originated within the Americas and is one among the foremost cosmopolitan of the world's food crops. Corn is used as livestock feed, as human food, as biofuel, and as raw material in industry. Within the colorful variegated strains referred to as corn are traditionally utilized in autumn harvest decorations.

Maize also referred to as corn may be a cereal grain. Maize has become a staple food in many parts of the globe, with total production surpassing that of wheat or rice. However, not all of this maize is consumed directly by humans. A number of the maize production is used for corn ethanol, animal feed and other maize products, such as corn starch and corn syrup. The six major varieties of corn are dent corn, flint maize, pod corn, popcorn, flour corn, and sweet corn.
