

Investment Opportunities in DCDA - Dicyandiamide (2-Cyanoguanidine).

Description:

Investment Opportunities in DCDA- Dicyandiamide (2-Cyanoguanidine). Profitable Business Plan to Start in ActivePharma Ingredient (API).

Dicyandiamide may be a synonymous name for the dimer of Cyanamide, which itself is used broadly in industrial production of melamine or within the agricultural industry of chemical fertilizer. Due to heavy use of the dicyandiamide fertilizer in pasture and caused the pollution event of dicyandiamide residue in milk or dairy products. Because beverage source for animal in many pastures and dicyandiamide is stability in water. Therefore, people are going to concentrate to the dicyandiamide residues in water.
