

Business Plan - Sodium Percarbonate (Sodium Carbonate Peroxide) Production

Description:

Business Plan - SodiumPercarbonate (Sodium Carbonate Peroxide) Production. Startup Industry with the Fastestand Biggest Growth.

SodiumPercarbonate may be a chemical compound used as an alternate for hydrogenperoxide with the formula $C_2H_6Na_4O_{12}$. Sodium Percarbonate is ready by addingsodium peroxide slowly to ice-cold ethyl alcohol. Sodium Percarbonate dissolvesrelatively fast in water, releasing sodium carbonate and hydrogen peroxidewithin the solution. The slight amount of moisture which are present alreadywithin the atmosphere are sufficient to bring about the decomposition of thePercarbonate.

SodiumPercarbonate is mainly used as bleaching chemical in laundry detergents, laundry additives and machinedishwashing products. The pure product (100 %) is also available for consumersas a laundry additive. Sodium Percarbonate may also be used in products fordrain cleaning, multipurpose cleaning or for denture cleansing. The amount ofsodium Percarbonate, which is used in household cleaning products.
