

# Woven Fiberglass Fabric Manufacturing Business Using E Class Imported Yarns (For Composites of Domestic as well as Export Markets)

## Description:

### Woven Fiberglass Fabric Manufacturing Business Using E Class Imported Yarns (For Composites of Domestic as well as Export Markets)

Fiberglass is a popular type of glassfiber-reinforced plastic. The fibers may be woven into a cloth, flattened into a sheet (known as a chopped strand mat), or randomly arranged. The plastic matrix can be either a thermoset polymer matrix (most commonly based on thermosetting polymers such as epoxy, polyester resin, or vinyl ester) or a thermoplastic matrix (most commonly based on thermoplastic polymers such as epoxy, polyester resin, or vinyl ester).
