

# The Complete Technology Book on Dyes & Dye Intermediates (2nd Revised Edition)

## Description:

### The Complete Technology Book on Dyes & Dye Intermediates (2<sup>nd</sup> Revised Edition)

Organic compounds or mixtures, as well as petroleum downstream materials, are dye intermediates that are synthesised for use in textiles, paints, plastics, paper, printing inks, and leather. Color, origin, chemical structure, and application process have all been used to classify dyestuffs into various categories. Acid orange, yellow, and acid black dyes, Melachite green crystal, Basic magenta lumps, and Anthraquinone Type Intermediates are some of the most common Dyes Intermediates. Acid, Direct, and Reactive Dyes all need them as a raw material.
