

Glucose Saline Solution Manufacturing Plant (IV fluids Used in Hospitals, Nursing Homes) Investment Opportunities in Pharma Sector

Description:

Glucose Saline Solution Manufacturing Plant (IV fluids Used in Hospitals, Nursing Homes) Investment Opportunities in Pharma Sector

Dextrose solution, also known as intravenous sugar solution, is a combination of dextrose (glucose) and water administered intravenously. It's used to treat low blood sugar and water loss but doesn't result in electrolyte loss. Fever, hyperthyroidism, high blood calcium, and diabetes insipidus can all cause water loss without electrolyte loss. It is required when an individual is ill, going through an operation or is not in the condition to eat or drink.
