Description:

A4 paper is the size most used in the world. It is used as the classic paper sheet in all industrialized countries. Today, it is used for all printing documents, letters, magazines, forms, notices, posters, catalogues, magazines. In Engineering A4 size paper is the mostly used as hard copy of drawing or document in a handy way. It can be found in everyday life.

In the light of the internet revolution, massive inroads of digital printing and print on demand, the growth in demand for cut A4 size paper has been phenomenal. In India, the segment growth of cut size has been around 18-20% per year. Beyond that the economy-value for money segment is growing @25% plus.

India is the fastest growing market for paper globally. In sync with economic growth, paper consumption is poised for a big leap forward. The sector has touched 14.88 million tonnes of capacity in 2015-16. The estimated turnover of the industry is Rs 50,000 crore approximately and its contribution to the exchequer is around Rs 4,500 crore. The industry provides employment to more than 0.5 million people directly and 1.5 million people indirectly. The paper industry also contributes towards fulfillment of various requirements of the industry as a whole like information dissemination, publicity etc. which in turn stimulate industrial growth of the country. The paper industry has, thus, a catalytic role to play not only for the overall growth of the industry but also for the living standards of the people.
