

How to Start a Packaged Drinking Water with PET Bottles Manufacturing Business.

Description:

How to Start a Packaged Drinking Water with PET Bottles Manufacturing Business.

Packed drinking water is water that has been filtered and disinfected in some way, such as by filtration, UV or ozone treatment, or reverse osmosis (RO), and then packaged in plastic or glass bottles or pouches for our use. A liquid can not contain sweeteners or chemical additives (other than flavours, extracts, essences) and must be calorie-free and sugar-free to be considered "bottled water."
