

Washing Powder Manufacturing Business. Rising Global Demand of Surfactants Industry.

Description:

Washing Powder Manufacturing Business. Rising Global Demand of Surfactants Industry. Start a Detergent/Washing Powder Business.

Laundry detergent, also known as washing powder, is a form of detergent (cleaning agent) that is used to clean clothes. Laundry detergent is available as a powder or a liquid. For hand and machine laundry, use general purpose washing powder (also known as "heavy duty"). Detergent powders contain ingredients that are extremely effective at cleaning your clothing. Calcium and magnesium are among the ingredients that make up the detergent powder's builders.
