

Lucrative Production Business of Magnesium Stearate. Business Opportunities in Chemical Industry.

Description:

Lucrative Production Business of Magnesium Stearate. Business Opportunities in Chemical Industry.

Magnesium stearate, often known as $\text{Mg}(\text{C}_{18}\text{H}_{35}\text{O}_2)_2$, is a chemical substance having the formula $\text{Mg}(\text{C}_{18}\text{H}_{35}\text{O}_2)_2$. It's a soap made up of two stearate (stearic acid's anion) and one magnesium cation (Mg^{2+}) equivalents in a salt. Magnesium stearate is a powder that is white and insoluble in water.
