

Planning New Industrial Park

Description:

Planning New Industrial Park- “self-contained island providing high-quality infrastructural facilities. Integrated industrial parks offer industrial, residential, and commercial areas with developed plots/ pre-built factories, power, telecom, water and other social infrastructure”.

A section of the city designated for industrial use is known as an industrial park. These areas are not intended for commercial or residential purposes. Ports, oil refineries, distribution centres, warehouses, and factories are all examples of industrial parks. The majority of industrial parks are located in places where the environment is favourable to industrial activity.
