

Steelmaking and Iron Products (Cast Iron, Compacted Graphite Irons, Ductile Iron)

Description:

The iron and steel industry is one of the most important industries in India. Most iron and steel in India is produced from iron ore. The Indian Ministry of Steel is concerned with: the coordination and planning of the growth and development of the iron and steel industry in the country, both in the public and private sectors; formulation of policies with respect to production, pricing, distribution, import and export of iron and steel, Ferro alloys and refractories; and the development of input industries relating to iron ore, manganese ore, chrome ore and refractories etc., required mainly by the steel industry.

The iron and steel industry is playing a major role in the growth story of modern India. The Government of India has taken several initiatives for the growth and development of Iron and Steel Industries in India. India can be segmented into five product segments: Grey Cast Iron, Steel, Spheroidal Graphite Iron, Non-ferrous Metals, and Malleable Iron.
