## **Description:**

Coconut is a versatile product and has multiple uses. Almost all the parts of a freshly grown coconut, eatable or otherwise, are used in some or the other manner. Coconut everything can be found in the natural food market. Coconut oil, coconut sugar, coconut water. Each of the different pieces of the coconut are used for different, and sometimes multiple, products. Therefore, oil competes with all of the other coconut products for the simple availability of the coconut plant.

The coconut is a very useful plant with a wide range of products being sourced from it. Coconut products are used to make everything from clothing to animal feed to beauty creams. Its kernel is harvested for its edible flesh and delicious water, while its husk is used for its strong fibers. Most important, however, are its oils, which are extracted, processed, and marketed for culinary, medicinal, and cosmetic uses alike. Such trendy products come from young green coconuts, fresh coconut and the trees' flowers.

## **Coconut products**
